

# CONTENTS

Commenced in May 1980

Vol. 37 No. 2 Feb. 2016 (Monthly)

|  |       |
|--|-------|
| Coupling model for unsteady MHD flow of generalized Maxwell fluid with radiation thermal transform.....                                | (137) |
| Yaqing LIU, Boling GUO   |       |
| Quasi-optimal complexity of adaptive finite element method for linear elasticity problems in two dimensions.....                       | (151) |
| Chunmei LIU, Liuqiang ZHONG, Shi SHU, Yingxiong XIAO   |       |
| Differential transform method for solving Richards' equation .....   | (169) |
| Xi CHEN, Ying DAI  |       |
| Sufficient conditions of Rayleigh-Taylor stability and instability in equatorial ionosphere .....                                      | (181) |
| Sicheng WANG, Sixun HUANG  |       |
| Unsteady MHD flow over exponentially stretching sheet with slip conditions.....  | (193) |
| T. HAYAT, A. SHAFIQ, A. ALSAEDI, S. A. SHAHZAD   |       |
| A class of exact solutions for $N$ -dimensional incompressible magnetohydrodynamic equations .....                                     | (209) |
| Ping LIU   |       |
| Analysis of periodic and aperiodic convective stability of double diffusive nanofluid convection in rotating porous layer .....        | (215) |
| S. AGARWAL, P. RANA  |       |
| Theoretical model for elliptical tube laterally impacted by two parallel rigid plates .....  | (227) |
| Haibo WANG, Ruirui LIU, Jialing YANG, Hua LIU, Yuxin SUN   |       |
| Saint-Venant torsion analysis of bars with rectangular cross-section and effective coating layers .....                                | (237) |
| H. TEIMOORI, R. T. FAAL, R. DAS  |       |
| Second-order two-scale computational method for ageing linear viscoelastic problem in composite materials with periodic structure..... | (253) |
| Yang ZHANG, Junzhi CUI, Yufeng NIE   |       |
| Size-dependent sinusoidal beam model for dynamic instability of single-walled carbon nanotubes.....                                    | (265) |
| R. KOLAHCHI, A. M. MONIRI BIDGOLI  |       |
