

## Contents

### Editorial

- 869 Perspectives on sustainability certification and design process – From evaluation tool to design tool**

C. Brunsgaard and T. S. Larsen

### Original Papers

- 873 Calculation and comparative analysis of thermal transmittance (U-value) of Scottish houses from recent centuries**

F. Rezvani and I. Z. Bribián

- 887 Moss-indoor vertical greenery system design protocol: Using moss as an indoor vertical greenery system in the tropics**

C. Wang, H. Li and S. A. Neoh

- 905 An analysis of low ambient pressure on fire risks associated with rigid polyurethane building façade insulation under various width constructions**

X. Ma, R. Tu, Y. Zeng and T. Fang

- 914 Zonal air exchange rate of a passive solar house and resultant sensible air heat transfer**

O. K. Overen, E. L. Meyer, G. Makaka, S. Ziuku and S. Mamphweli

- 927 Fundamental investigation of solid waste generation and disposal behaviour in higher education institute in the Kingdom of Saudi Arabia**  
M. Saleem, N. I. Blaisi, O. S. D. Alshamrani and A. Al-Barjis

- 938 Investigation of burning photovoltaic panels on a double-skin facade with ejecting flame from an adjacent room fire**

L. Miao and C.-L. Chow

- 950 Preliminary study on heating energy consumption distribution of dwellings in hot summer and cold winter climate region of China**

Y. Li and X. Li

- 964 Residents' lamp purchasing behaviour, indoor lighting characteristics and choices in Swedish homes**

K. M. Gerhardsson, T. Laike and M. Johansson

- 984 Numerical investigation on the effectiveness of positive pressure ventilation technology in a multi-layer subway station**

Y. Zhou, R. Bu, J. Gong, Z. Xu, H. Chen and C. Fan

- 999 Inhibitory effect of mould growth on formaldehyde emissions from medium-density fibreboards: Evidence from field observations in three experimental houses**

W. Liang, M. Lv and X. Yang
