

---

Editorial

- 293 Energy efficiency of industrial buildings**  
Y. Wang, Y. Cao and X. Meng

---

Review Paper

- 298 A review of green systems within the indoor environment**  
T. A. Moya, A. van den Dobbelsteen, M. Ottel  and P. M. Bluysen

---

Original Papers

- 310 Life cycle cost and CO<sub>2</sub> emission simulation models of apartment building projects using system dynamics**  
D.-B. Lim, S. Son, S. Kim and J. Park
- 322 Rapid prediction of the transient effect of the initial contaminant condition using a limited number of sensors**  
X. Shao, K. Wang and X. Li
- 335 Effects of air relative humidity and ventilation rate on particle concentrations within a reduced-scale room**  
T. Y. Yang, G. L. Riskowski and A. C.-Z. Chang
- 345 A parametric study of the combined effects of window property and air vent placement**  
Q. Duan and J. Wang
- 362 Association between the emissions of volatile organic compounds from vehicular cabin materials and temperature: Correlation and exposure analysis**  
T. Yang, P. Zhang and J. Xiong
- 372 Effects of the radiant heating system location on both the airflow and ventilation efficiency in a room**  
M. Rabanillo-Herrero, M.  . Padilla-Marcos, J. Feij -Mu oz and A. Meiss
- 384 Fungi-induced paint deterioration and air contamination in the Assiut University hospital, Egypt**  
I.R. Abdel-Rahim, N. A. Nafady, M. M. K. Bagy, M. H. Abd-Alla and A. M. Abd-alkader
- 401 Numerical investigation of thermal comfort and transport of expiratory contaminants in a ventilated office with an air curtain system**  
D. Y. Park and S. Chang
- 422 The dynamic thermal process of indoor environment and building envelope during intermittent heating**  
Y. Li, M. Wang, Y. Zhang and E. Long
