

Aircraft Engineering and Aerospace Technology

An International Journal

Number 4

- 198 Access this journal online
- 199 Probabilistic design for turbine disk at high temperature
Dianyin Hu, Rongqiao Wang and Zhi Tao
- 208 Investigation of process parameters in superplastic free bulge forming
M. Sedighi and M. Moattari
- 213 Analysis of dual secondary injection for thrust vectoring
Elham Mohammadi and Alireza Toloei
- 221 Attitude control system for the nano-astrometry satellite "Nano-JASMINE"
Takaya Inamori, Nobutada Sako and Shinichi Nakasuka
- 229 Foreign object debris surveillance network for runway security
Weishi Chen, Qunyu Xu, Huansheng Ning, Taosheng Wang and Jing Li
- 235 Integrated approach for rotor blade manufacturing cost estimate
Than Lin, Jae-Woo Lee and Tun Lwin
- 245 Paper from the *AEAT* archives
