

Journal of Systems Engineering and Electronics

Volume 29 Number 5

October 2018

CONTENTS

ELECTRONICS TECHNOLOGY

- 881 Hybrid orthogonal and non-orthogonal pilot distribution based channel estimation in massive MIMO system**

ZHANG Ruoyu, ZHAO Honglin, ZHANG Jiayan, and JIA Shaobo

- 899 Properties of Gauss-Newton filter in linear cases**

BAO Zhichao and JIANG Qiuxi

- 908 Impact of ionospheric irregularity on SBAS integrity: spatial threat modeling and improvement**

BAO Junjie, LI Rui, LIU Pan, and HUANG Zhigang

- 918 High-resolution digital beamforming of UWB signals based on Carathéodory representation for delay compensation and array extrapolation**

DU Qiang, SONG Yaoliang, JI Chenhe, and AHMAD Zeeshan

- 927 Rigid graph-based three-dimension localization algorithm for wireless sensor networks**

LUO Xiaoyuan, ZHONG Wenjing, LI Xiaolei, and GUAN Xinping

DEFENCE ELECTRONICS TECHNOLOGY

- 937 Variable scheduling interval task scheduling for phased array radar**

ZHANG Haowei, XIE Junwei, ZHANG Zhaojian, SHAO Lei, and CHEN Tangjun

- 947 Using deep learning to detect small targets in infrared oversampling images**

LIN Liangkui, WANG Shaoyou, and TANG Zhongxing

SYSTEMS ENGINEERING

- 953 Weapon configuration, allocation and route planning with time windows for multiple unmanned combat air vehicles**

ZHANG Jiaming, LIU Zhong, SHI Jianmai, and CHEN Chao

- 969 Sensors deployment optimization in multi-dimensional space based on improved particle swarm optimization algorithm**

TANG Mingnan, CHEN Shijun, ZHENG Xuehe, WANG Tianshu, and CAO Hui

- 983 Nonlinear optimal model and solving algorithms for platform planning problem in battlefield**

WANG Xun, YAO Peiyang, ZHANG Jieyong, and WAN Lujun

- 995 Towards optimal recovery scheduling for dynamic resilience of networked infrastructure**

WANG Yang, FU Shanshan, WU Bing, HUANG Jinhui, and WEI Xiaoyang

- 1009 Dynamic hesitant fuzzy linguistic group decision-making from a reliability perspective**

MA Zhenzhen, PONNAMBALAM Kumaraswamy, ZHU Jianjun, and ZHANG Shitao

CONTROL THEORY AND APPLICATION

- 1022 Active disturbance rejected predictive functional control for space vehicles with RCS**

TIAN Jiayi and ZHANG Shifeng

- 1036 Impact angle control over composite guidance law based on feedback linearization and finite time control**

ZHANG Xiaojian, LIU Mingyong, LI Yang, and ZHANG Feihu

- 1046 Extended differential geometric guidance law for intercepting maneuvering targets**

HUANG Jingshuai, ZHANG Hongbo, TANG Guojian, and BAO Weimin

- 1058 Obstacle avoidance method of three-dimensional obstacle spherical cap**

YANG Xiuxia, ZHANG Yi, and ZHOU Weiwei

SOFTWARE ALGORITHM AND SIMULATION

- 1069 Server load prediction algorithm based on CM-MC for cloud systems**

XU Xiaolong, ZHANG Qitong, MOU Yiqi, and LU Xinyuan

- 1079 Adaptive image enhancement algorithm based on fuzzy entropy and human visual characteristics**

WANG Baoping, MA Jianjun, HAN Zhaoxuan, ZHANG Yan, FANG Yang, and GE Yimeng

RELIABILITY

- 1089 Inference and optimal design on step-stress partially accelerated life test for hybrid system with masked data**

SHI Xiaolin, LU Pu, and SHI Yimin

- 1101 Remaining lifetime prediction for nonlinear degradation device with random effect**

CAI Zhongyi, CHEN Yunxiang, GUO Jiansheng, ZHANG Qiang, and XIANG Huachun
