

## CONTENTS

### ELECTRONICS TECHNOLOGY

- 1 Heterogeneous performance analysis of the new model of CFAR detectors for partially-correlated  $\chi^2$ -targets**  
EL\_MASHADE Mohamed Bakry
- 18 Quantum fireworks algorithm for optimal cooperation mechanism of energy harvesting cognitive radio**  
GAO Hongyuan, DU Yanan, and LI Chenwan
- 31 Cognitive anti-jamming receiver under phase noise in high frequency bands**  
FANG Zheng, LI Haitao, and QIAN Yiming
- 39 Multi-channel signal parameters joint optimization for GNSS terminals**  
WANG Qian, ZHANG Chuanding, and XIAN Deyong

### DEFENCE ELECTRONICS TECHNOLOGY

- 48 Waveform design for radar and extended target in the environment of electronic warfare**  
WANG Yuxi, HUANG Guoce, and LI Wei
- 58 Cramer-Rao bounds for the joint delay-Doppler estimation of compressive sampling pulse-Doppler radar**  
CHEN Shengyao and XI Feng
- 67 Pulse interleaving scheduling algorithm for digital array radar**  
ZHANG Haowei, XIE Junwei, ZHANG Zhaojian, ZONG Binfeng, and SHENG Chuan

### SYSTEMS ENGINEERING

- 74 Using approximate dynamic programming for multi-ESM scheduling to track ground moving targets**  
WAN Kaifang, GAO Xiaoguang, LI Bo, and LI Fei
- 86 Autonomous air combat maneuver decision using Bayesian inference and moving horizon optimization**  
HUANG Changqiang, DONG Kangsheng, HUANG Hanqiao, TANG Shangqin, and ZHANG Zhuoran
- 98 Analysis of detection capabilities of LEO reconnaissance satellite constellation based on coverage performance**  
MENG Shaofei, SHU Jiansheng, YANG Qi, and XIA Wei

- 105 Grey interpolation approach for small time-lag samples based on grey dynamic relation analysis**

WANG Junjie, DANG Yaoguo, XU Ning, and DING Song

## **CONTROL THEORY AND APPLICATION**

- 116 Robust controller design for compound control missile with fixed bounded convergence time**

YUN Yuhang, TANG Shengjing, GUO Jie, and SHANG Wei

- 134 Optimal feedback based control for Mars entry trajectory tracking**

HUANG Yuechen, LI Haiyang, and SHEN Hongxin

- 142 Adaptive weighting impact angle optimal guidance law considering seeker's FOV angle constraints**

LI Ran, WEN Qiuqiu, TAN Wangchun, and ZHANG Yijie

- 152 Point mass filter based matching algorithm in gravity aided underwater navigation**

HAN Yurong, WANG Bo, DENG Zhihong, and FU Mengyin

- 160 Controller design for stochastic nonlinear systems with matched conditions**

LI Guifang and Ye-Hwa CHEN

- 166 Improved quantum bacterial foraging algorithm for tuning parameters of fractional-order PID controller**

LIU Lu, SHAN Liang, DAI Yuewei, LIU Chenglin, and QI Zhidong

- 176 Event-triggered sampling and fault-tolerant control co-design based on fault diagnosis observer**

QIU Aibing, ZHANG Jing, JIANG Bin, and GU Juping

## **SOFTWARE ALGORITHM AND SIMULATION**

- 187 Improved evidential fuzzy c-means method**

JIANG Wen, YANG Tian, SHOU Yehang, TANG Yongchuan, and HU Weiwei

- 196 Pre-detection and dual-dictionary sparse representation based face recognition algorithm in non-sufficient training samples**

ZHAO Jian, ZHANG Chao, ZHANG Shunli, LU Tingting, SU Weiwen, and JIA Jian

## **RELIABILITY**

- 203 Joint optimization of sampling interval and control for condition-based maintenance using availability maximization criterion**

LI Xin, CAI Jing, ZUO Hongfu, LIU Ruochen, CHEN Xi, and GUO Jiachen

- 216  $t/k$ -fault diagnosis algorithm of  $n$ -dimensional hypercube network based on the MM\* model**

LIANG Jiarong, ZHOU Ning, and YUN Long
