

CONTENTS

Research Articles

- | | |
|--|---------|
| Analysis of a hand-foot-mouth disease model
<i>S. Sharma and G. P. Samanta</i> | 1750016 |
| Swallowing of Casson fluid in oesophagus under the influence
of peristaltic waves of varying amplitude
<i>S. K. Pandey and S. K. Tiwari</i> | 1750017 |
| Strong stability of optimal design to dynamic system for the
fed-batch culture
<i>J. Zhang, J. Yuan, Z. Dong, E. Feng,
H. Yin and Z. Xiu</i> | 1750018 |
| On global stability analysis for SEIRS models in epidemiology
with nonlinear incidence rate function
<i>L. Zheng, X. Yang and L. Zhang</i> | 1750019 |
| Analysis of a hepatitis B viral infection model with immune
response delay
<i>J. Pang and J.-A. Cui</i> | 1750020 |
| A model on the biological treatment of saline wastewater
<i>A. Goyal and P. Sharma</i> | 1750021 |
| Global dissipativity of stochastic Lotka-Volterra system
with feedback controls
<i>Q. Zhang, X. Zhang and H. Yang</i> | 1750022 |
| Study of refuge use on a predator-prey system with a
competitor for the prey
<i>D. Mukherjee</i> | 1750023 |

Reports/Science Edition, Biological Abstracts, BIOSIS Previews

CONTENTS — (Continued)

- On SIR epidemic models with generally distributed infectious periods: Number of secondary cases and probability of infection
A. Gómez-Corral and M. López-García 1750024
- Oxygen diffusion in a spherical cell subject to nonlinear Michaelis-Menten kinetics: Mathematical analysis by two exact methods
H. Fatoorehchi, H. Abolghasemi, L. Villafuerte and R. Zarghami 1750025
- Based on rough set and fuzzy clustering of MRI brain segmentation
Y. Zhang, S. Ye and W. Ding 1750026
- Exponential stability and periodicity of memristor-based recurrent neural networks with time-varying delays
W. Zhang, C. Li and T. Huang 1750027
- Average conditions for permanence and extinction in nonautonomous single-species Kolmogorov systems
J. Zhao and Z. Chen 1750028
- Asymptotic behavior and blowup for two generalized Ginzburg-Landau type equations with several nonlinear source terms
S. Jin, Z. Zhang and Q. Zhang 1750029
- Global properties for an age-structured within-host model with Crowley-Martin functional response
S. Wang and X. Song 1750030

Submission

Manuscripts are accepted for consideration only if they have not been published and is not under consideration elsewhere. Papers should be submitted via the online submission system at editorialmanager.com/ijb/login. The first author of each accepted manuscript is assumed to have transferred copyright to the journal. The first author of each accepted manuscript is assumed to have transferred copyright to the journal.

Types of Articles

IJB accepts research papers as original contributions, presentation of recent results in the field, and review of submitted manuscripts, and even theoretical analyses.

Preparation of Manuscript

The manuscript must be prepared in a standard format. Only one side of the paper should be used. Tables, etc. must be included in the manuscript.

Abstracts should be less than 100 words. Each page of the manuscript should be indicated in the text with superscript numbers.

Figures should be numbered in the text. Likewise, tables should be numbered in the text. Every figure and table must have a caption.

References should be listed in the text in arabic numerals with the page number. References should be typed at the end of the text. Abbreviations for journal names should be as follows:

- [1] M. Artin, On Azumaya algebras, *Ann. of Math.* (2) 52 (1969) 532-563.
- [2] C. Gundlach, *Critical Phenomena*, 2 (1999), 4. [Online article: <http://www.cmu.edu/~gundlach/irr-1999-4>].
- [3] F. John, *Partial Differential Equations* (Springer Verlag, 1971).
- [4] E. H. Lieb and W. Thirring, *Schrödinger Hamiltonian*, *Mathematical Physics: Essays in Honor of* (New York, 1976), pp. 265-274.
- [5] A. Olver, *Symplectic geometry*, *Mathematical Physics: Essays in Honor of* (New York, 1976), pp. 275-284.
