

# INTERNATIONAL JOURNAL OF BIOMATHEMATICS

Vol. 10, No. 1 (January 2017)

## CONTENTS

### Research Articles

- Traveling wave solutions of a delayed prey–predator system  
with diffusion 1750001  
*J. Liu and T. Zhang*
- The Volterra–Lyapunov matrix theory for global stability analysis  
of a model of the HIV/AIDS 1750002  
*M. S. Zahedi and N. S. Kargar*
- The impact of media coverage with a piecewise transmission rate  
in the spread of diseases 1750003  
*M. Liu and L. Zuo*
- Harvest control for a delayed stage-structured diffusive  
predator–prey model 1750004  
*X. Zhang and H. Zhao*
- Impact of climate factors on contact rate of vector-borne  
diseases: Case study of malaria 1750005  
*E. Dangbé, A. Perasso, D. Irépran and D. Békollé*
- A priori, de novo* mathematical exploration of gene expression  
mechanism via regression viewpoint with briefly cataloged  
modeling antiquity 1750006  
*S. Jauhari and S. A. M. Rizvi*
- A comparative study of different covariance structure models  
for the analysis of repeated measurement data 1750007  
*Y. Wu, L. Zhang, L. Zhou, X. Liu, L. Liu,  
Y. Zhang and D. Yi*

(Continued)

Covered in Science Citation Index Expanded (also known as SciSearch®), Journal Citation  
Reports/Science Edition, Biological Abstracts, BIOSIS Previews

# CONTENTS — (Continued)

- Analytical approximation of heat and mass transfer in MHD non-Newtonian nanofluid flow over a stretching sheet with convective surface boundary conditions 1750008  
*N. Freidoonimehr, M. M. Rashidi, M. H. Momenpour and S. Rashidi*
- The maximum amplification of perturbations in ecological systems 1750009  
*H. Wang, J. Zhang and X.-S. Yang*
- A delayed predator-prey system with impulsive diffusion between two patches 1750010  
*H.-L. Li, L. Zhang, Z.-D. Teng and Y.-L. Jiang*
- Stability analysis of hybrid neural networks with impulsive time window 1750011  
*X. Wang, H. Wang, C. Li and T. Huang*
- Global dynamics of a viral infection model with full logistic terms and antivirus treatments 1750012  
*L. Song, C. Ma, Q. Li, A. Fan and K. Wang*
- Complex dynamic behaviors of a discrete predator-prey model with stage structure and harvesting 1750013  
*B. Chen and J. Chen*
- The stability of the positive solution for a fractional SIR model 1750014  
*Y. Guo*
- Intermediate filament dynamics: Disassembly regulation 1750015  
*C. Sun, J. Arino and S. Portet*

## Submission

Manuscripts are accepted for consideration only if they have not been published and is not under consideration elsewhere. Papers should be submitted via the IJB website at [editorialmanager.com/ijb/login](http://editorialmanager.com/ijb/login). It is assumed to have transferred all rights to the publisher. The first author of each accepted manuscript will receive 50 offprints free of charge.

## Types of Articles

IJB accepts research papers and review articles. The presentation of recent results and new developments in submitted manuscripts, and evaluation of existing work.

## Preparation of Manuscript

The manuscript must be prepared in a standard format. The text. Only one side of the paper should be used. Figures, tables, etc. must be included in the manuscript.

Abstracts should be less than 200 words. Use arabic numerals. Each page of the manuscript should be indicated in the text with superscript numbers.

Figures should be numbered in the text. Likewise, tables should be numbered. Every figure and table must be self-explanatory.

References should be listed at the end of the text in arabic numerals with the page number. They should be typed at the end of the text. Use abbreviations for journal names. The list of references should be as follows:

- [1] M. Artin, On Azumaya algebras, *Ann. of Math.* (2) 52 (1969) 532-563.
- [2] C. Gundlach, *Critical Phenomena*, 2 (1999), 4. [Online article] <http://www.cmu.edu/~gundlach/irr-1999-4>.
- [3] F. John, *Partial Differential Equations* (Springer Verlag, 1971).
- [4] E. H. Lieb and W. Thirring, *Schrödinger Hamiltonians and the Weyl Hypothesis*, *Mathematical Physics: E* (New York, 1976), pp. 26-42.
- [5] A. Olver, *Symplectic Geometry* (Cambridge University Press, 1998).
