

INTERNATIONAL JOURNAL OF BIOMATHEMATICS
Vol. 4, No. 1 (March 2011)

CONTENTS

A CTL-Inclusive Mathematical Model for Antiretroviral Treatment of HIV Infection <i>N. Tarfulea, A. Blink, E. Nelson and D. Turpin Jr.</i>	1
Positive Periodic Solutions for a Generalized Impulsive N -Species Gilpin–Ayala Competition System with Continuously Distributed Delays on Time Scales <i>T. Zhang and Y. Li</i>	23
A Mathematical Model of the Physical Growth Mechanism and Geometrical Characterization of Growing Forms <i>Y. K. Shestopaloff</i>	35
Boundedness and Exponential Stability for Nonautonomous FCNNs with Reaction-Diffusion Terms and Time-Varying Delays <i>S. Niu, H. Jiang and Z. Teng</i>	55
Exploring the Effects of Parameter Heterogeneity on the Intrinsic Dynamics of HIV/AIDS in Heterosexual Settings <i>E. T. Ngarakana-Gwasira, C. P. Bhunu, S. Mushayabasa, S. D. Hove-Musekwa, W. Garira and J. M. Tchuenche</i>	75
A Vector-Host Epidemic Model with Host Migration <i>Q. Kong, Z. Qiu and Y. Zou</i>	93
Dispersion Study of Axially Symmetric Waves in Cylindrical Bone Filled with Marrow <i>P. M. Reddy, B. S. Rani and M. Tajuddin</i>	109
A Biological Meaning in Asymptotic Stability of the Delay Logistic Differential Equations <i>H. Li</i>	119
