

CONTENTS

- Modeling and qualitative analysis of diabetes therapies with state feedback control 1450035
M. Huang and X. Song
- A fractional-order model of HIV infection: Numerical solution and comparisons with data of patients 1450036
A. A. M. Arafa, S. Z. Rida and M. Khalil
- Dynamic analysis of a stage-structured predator-prey system with disturbed time delay and birth pulse 1450037
W. Wang, Z. Xiong and F. Wang
- On the complexity of average path length for biological networks and patterns 1450038
W. Asif, H. K. Qureshi, A. Iqbal and M. Rajarajan
- A fractional-order toxin producing phytoplankton and zooplankton system 1450039
M. Javidi and N. Nyamoradi
- Existence and global asymptotic stability of positive almost periodic solutions of a two-species competitive system 1450040
Q. Wang, Z. Liu, Z. Li and R. A. Cheke
- Analysis of a delayed epidemic model with non-monotonic incidence rate and vertical transmission 1450041
J. Xu, W. Xu and Y. Zhou
- Bifurcation analysis in a stage-structured predator-prey model with maturation delay 1450042
J. Liu
- Global stability of an epidemic model for HIV-TB co-infection with infection-age 1450043
X.-Y. Wang, Y.-P. Bai, J.-Y. Yang and F.-Q. Zhang

Covered in Science Citation Index Expanded (also known as SciSearch®), Journal Citation Reports/Science Edition, Biological Abstracts, BIOSIS Previews

CONTENTS — (Continued)

- Improved modified moving average analysis of T-wave alternans using
least squares-based curve fitting method 1450044
X.-K. Wan, K.-H. Yan, A. Li and M.-H. Wu
- Qualitative analysis of a chemostat model with inhibitory exponential
substrate uptake and a time delay 1450045
Q. Dong and W. Ma
- Theory of optimal harvesting for a nonlinear size-structured
population in periodic environments 1450046
Z.-R. He and R. Liu
