

Contents

Development of forging process design to close internal voids	415
H. Kakimoto, T. Arikawa, Y. Takahashi, T. Tanaka, Y. Imaida	
Influence of tool rake angle on the quality of pure magnesium chip-consolidated product	423
A.R. Anilchandra, M.K. Surappa	
Determination of the flow stress of five AHSS sheet materials (DP 600, DP 780, DP 780-CR, DP 780-HY and TRIP 780) using the uniaxial tensile and the biaxial Viscous Pressure Bulge (VPB) tests	429
A. Nasser, A. Yadav, P. Pathak, T. Altan	
Meso-nozzle fabrication for refractory metals using thermal-property mismatch	437
A. Bucheeri, H. Kurishita, R. Ozone, T. Naoe, M. Katoh, M. Futakawa, K. Maekawa	
Shot peening on the high-strength wrought magnesium alloy AZ80—Effect of peening media	445
P. Zhang, J. Lindemann, C. Leyens	
Electrospinning of carbon nanofiber supported Fe/Co/Ni ternary alloy nanoparticles	451
C. Tekmen, Y. Tsunekawa, H. Nakanishi	
Development of tribo-simulator for hot stamping	456
A. Yanagida, T. Kurihara, A. Azushima	
Effect of filtration on the morphology and mechanical properties of Mg molten alloy entering the mould cavity	461
E. Nazari, S.H. Razavi, S.M.A. Boutorabi	
Effects of abrasive tools on surface finishing under brittle-ductile grinding regimes when manufacturing glass	466
I. Demirci, S. Mezghani, A. Mkaddem, M.E. Mansori	
Optimization method for stamping tools under reliability constraints using genetic algorithms and finite element simulations	474
Y. Ledoux, P. Sébastien, S. Samper	
Nucleation kinetics of continuously cooling Fe–17 at.%B droplets produced by controlled capillary jet breakup	487
V. Bialiauskaya, T. Ando	
Fabrication and properties of a novel ZnO/Cu composite	497
Q.Z. Wang, C.X. Cui, D.M. Lu, S.J. Bu	
Fabrication of micro-hole arrays using precision filled wax metal deposition	504
S.-T. Chen, T.-S. Luo	
A novel spin-bonding process for manufacturing multilayered clad tubes	510
M.S. Mohebbi, A. Akbarzadeh	
Microstructure and mechanical properties of commercial-purity titanium after rapid (induction) heat treatment	518
P.E. Markovsky, S.L. Semiatin	
Effects of replacing metal powder with powder space holder on metal foam produced by metal injection moulding	529
A. Manonukul, N. Muenya, F. Léaux, S. Amaranan	
Effect of solidification rate on the morphology and distribution of eutectic carbides in centrifugal casting high-speed steel rolls	536
Y. Luan, N. Song, Y. Bai, X. Kang, D. Li	
Mechanics of continuous equal-channel angular extrusion	542
V.M. Segal	
Regimes of droplet train impact on a moving surface in an additive manufacturing process	550
S. Fathi, P. Dickens, F. Fouchal	
Effects of processing parameters on the bond strength of Cu/Cu roll-bonded strips	560
M. Abbasi, M.R. Toroghinejad	
Thermal behaviour of the consumable electrode in the vacuum arc remelting process	564
H.E. Mir, A. Jardy, J.-P. Bellot, P. Chapelle, D. Lasalmonie, J. Senevat	
Aspects of material removal mechanism in plain waterjet milling on gamma titanium aluminide	573
M.C. Kong, D. Axinte, W. Voice
