Ductile and brittle material removal mechanisms in natural nacre—A model for novel implant materials .....	1827
B. Denkena, J. Koehler, A. Moral	
Pulsed Nd:YAG laser seam welding of AISI 316L stainless steel thin foils. ....	1838
V.A. Ventrella, J.R. Berretta, W. de Rossi	
The effects of rolling method changes on productivity in thick plate rolling process. ....	1844
C.H. Moon, Y. Lee	
MK <sup>2</sup> —A novel assembly injection molding process for the combination of functional metal surfaces with polymer structures .....	1852
D. Drummer, E. Schmachtenberg, G. Hülner, S. Meister	
Prediction of shear-induced fracture in sheet metal forming .....	1858
Y. Li, M. Luo, J. Gerlach, T. Wierzbicki	
Process design of high-strength bolt of fully pearlitic high-carbon steel .....	1870
H.-C. Lee, Y.-G. Jin, Y.-H. Lee, I.-H. Son, D.-L. Lee, Y.-T. Im	
Numerical and experimental study on in-plane bending of microchannel aluminum flat tube .....	1876
Q. Zhang, D. Tang, D. Li, Y. Peng	
Crack deviation during trimming of aluminium automotive sheets .....	1885
A. Bacha, D. Daniel, H. Klocker	
Processing of floor tiles bearing ornamental rock-cutting waste .....	1898
A.J. Souza, B.C.A. Pinheiro, J.N.F. Holanda	
Production and characterization of a three-dimensional cellular metal-filled ceramic composite. ....	1905
D. Cree, M. Pugh	
Pulsed Nd:YAG laser cutting of NiTi shape memory alloys—Influence of process parameters .....	1918
R. Pfeifer, D. Herzog, M. Hustedt, S. Barcikowski	
Experimental and numerical analysis of multilayered steel sheets upon bending .....	1926
T. Oya, N. Tiesler, S. Kawanishi, J. Yanagimoto, T. Koseki	
Comparison between analytical and experimental roughness values of components created by incremental forming. ....	1934
M. Durante, A. Formisano, A. Langella	
Mechanical characterization of friction stir spot microwelds .....	1942
D.-A. Wang, C.-W. Chao, P.-C. Lin, J.-Y. Uan	
Evaluation of factors influencing deep cryogenic treatment that affect the properties of tool steels. ....	1949
A. Oppenkowski, S. Weber, W. Theisen	
Microstructure and mechanical performance of resistance spot-welded cold-rolled high strength austenitic stainless steel .....	1956
W. Liu, R. Wang, J. Han, X. Xu, Q. Li	
Functional behaviour of paper coated with zinc oxide-soluble starch nanocomposites .....	1962
V. Prasad, A.J. Shaikh, A.A. Kathe, D.K. Bisoyi, A.K. Verma, N. Vigneshwaran	
Improvement of workpiece quality in face milling of aluminum alloys .....	1968
D. Biermann, M. Heilmann	
Analytical solution of the tooling/workpiece contact interface shape during a flow forming operation. ....	1976
M.J. Roy, D.M. Maijer, R.J. Klassen, J.T. Wood, E. Schost

Preparation of in situ-formed WC/Fe composite on gray cast iron substrate by a centrifugal casting process ... 1986  
 L. Niu, M. Hojamberdiev, Y. Xu

The response of carbon black filled high-density polyethylene to microwave processing ..... 1991  
 F. Liu, X. Qian, X. Wu, C. Guo, Y. Lei, J. Zhang

Simulation of residual stress induced by a laser peening process through inverse optimization of material models ..... 1997  
 H.K. Amarchinta, R.V. Grandhi, A.H. Clauer, K. Langer, D.S. Stargel

Comparison of earing behavior between continuous cast and direct chill cast AA 5182 aluminum alloys during cold rolling and annealing ..... 2007  
 J. Li, W.C. Liu, H. Yuan, Y.K. Gao

Extruded tellurite glass optical fiber preforms ..... 2016  
 A. Belwalkar, H. Xiao, W.Z. Misiolek, J. Toulouse

An experimental study of heat transfer in aluminum castings during water quenching ..... 2023  
 B. Xiao, Q. Wang, P. Jadhav, K. Li

Ductility of a magnesium alloy in warm forging with controlled forming speed using a CNC servo press ... 2029  
 R. Matsumoto, K. Osakada

Mixed logical dynamical model for back bead width prediction of pulsed GTAW process with misalignment. ... 2036  
 H. Ma, S. Wei, T. Lin, S. Chen

Numerical and experimental study on nugget formation in resistance spot welding for three pieces of high strength steel sheets ..... 2045  
 N. Ma, H. Murakawa

Numerical modeling of inconel 738LC deposition welding: Prediction of residual stress induced cracking ... 2053  
 Y. Danis, E. Lacoste, C. Arvieu

Hook formation and mechanical properties in AZ31 friction stir spot welds ..... 2062  
 Y.H. Yin, N. Sun, T.H. North, S.S. Hu

Numerical simulation of heat transfer and fluid flow of molten metal in MMA-St copolymer lost foam casting process ..... 2071  
 A. Charchi, M. Rezaei, S. Hossainpour, J. Shayegh, S. Falak

Process optimization of Ti-Nb alloy coatings on a Ti-6Al-4V plate using a fiber laser and blended elemental powders ..... 2081  
 V. Fallah, S.F. Corbin, A. Khajepour

data given in Table 2) lies within the single-phase region of  $\alpha$ (Ti-Nb) solid solution in the phase diagram shown in Fig. 7(a). Fig. 7(b) shows the corresponding single-phase structure consisting of  $\alpha$ (Ti-Nb) dendrites solidified at different orientations throughout the clad section. Thus, with a set of parameters, formation of a uniform single-phase structure can also be ensured. The first cladding with the cross-section shown in Fig. 8 is made in three layers each consisting of 13 tracks overlapped by 80% in width. The EDS anal-

Fig. 8. An optical image showing the polished cross-section of a multi-layer Ti-Nb deposit on a Ti-6Al-4V substrate.
