

Contents

New approach to gas pressure profile prediction for high temperature AA5083 sheet forming	825
F.S. Jarrar, L.G. Hector Jr., M.K. Khraisheh, A.F. Bower	
Deep drawing simulation of a metastable austenitic stainless steel using a two-phase model	835
S. Gallée, P. Pilvin	
A newly developed tool without probe for friction stir spot welding and its performance	844
Y. Tozaki, Y. Uematsu, K. Tokaji	
Pulse electrochemical finishing: Modeling and experiment	852
N. Ma, W. Xu, X. Wang, B. Tao	
Analysis for the wear resistance anisotropy of diamond cutting tools in theory and experiment	858
W.J. Zong, Z.Q. Li, T. Sun, D. Li, K. Cheng	
The effect of process and material parameters on the coefficient of friction in the flat-die test	868
E.D. Szakaly, J.G. Lenard	
Formability testing of AZ31B magnesium alloy tube at elevated temperature	877
Z. He, S. Yuan, G. Liu, J. Wu, W. Cha	
Studies on the micro-laser spot welding of an NdFeB permanent magnet with a low carbon steel	885
B. Chang, S. Bai, D. Du, H. Zhang, Y. Zhou	
Development of a nanostructure microstructure in the Al–Ni system using the electrospark deposition process	892
D.W. Heard, M. Brochu	
Grinding characteristics in high speed grinding of engineering ceramics with brazed diamond wheels	899
J. Chen, J. Shen, H. Huang, X. Xu	
A finite element analysis for asymmetric contraction after coiling of hot-rolled steel	907
H.-H. Cho, Y.-G. Cho, Y.-R. Im, J.K. Lee, J.-H. Kwak, H.N. Han	
The carrying capacity of conical interference-fit joints with laser reinforcement zones	914
L. Sniezek, J. Zimmerman, A. Zimmerman	
The effect of material selection and manufacturing process on the surface finish of carbon fibre composites	926
M.L. Herring, J.I. Mardel, B.L. Fox	
3D finite element modeling of the thermally induced residual stress in the hybrid laser/arc welding of lap joint	941
F. Kong, R. Kovacevic	
Technological windows for MIAB welding of tubes featuring original longitudinal magnetization system with peripheral solenoids	951
D. Iordachescu, M. Iordachescu, B. Georgescu, R.M. Miranda, J. Ruiz-Hervias, J.L. Ocaña	
A new starch-based binder for metal injection molding	961
H. Abolhasani, N. Muhamad	
An improved prediction of stability lobes using nonlinear thin wall dynamics	969
O.B. Adetoro, W.M. Sim, P.H. Wen
