

Contents

Asymmetric forming of aluminum sheets by synchronous spinning	585
I. Shimizu	
B-spline approximation methods for digital image reconstruction in strain measurement	593
H. Deng, A. Ben-Zvi, J.B. Wiskel, H. Henein	
Understanding the material flow path of friction stir welding process using unthreaded tools	603
O. Lorrain, V. Favier, H. Zahrouni, D. Lawrjaniec	
Analysis of manufacturing parameters on the shear strength of aluminium adhesive single-lap joints	610
A.M. Pereira, J.M. Ferreira, F.V. Antunes, P.J. Bártolo	
Prediction of cooling curves during solidification of Al 6061-SiC _p based metal matrix composites using finite element analysis	618
S.K. Jagadeesh, C.S. Ramesh, J.M. Mallikarjuna, R. Keshavamurthy	
Microstructure evolution of rheo-cast A356 aluminium alloy in consideration of different cooling conditions by means of the cooling channel process	624
M. Bünck, N. Warnken, A. Bührig-Polaczek	
EDM technology and strategy development for the manufacturing of complex parts in SiSiC	631
S. Clijsters, K. Liu, D. Reynaerts, B. Lauwers	
The coating of TiC layer on the surface of nickel by electric discharge coating (EDC) with a multi-layer electrode	642
Y.-L. Hwang, C.-L. Kuo, S.-F. Hwang	
Improvement of stretch flangeability of ultra high strength steel sheet by smoothing of sheared edge	653
K.-i. Mori, Y. Abe, Y. Suzui	
Nanolayer CrN _x /WN _y coatings used on micro drills for machining of printed circuit boards	660
S.H. Yao, Y.L. Su, W.H. Kao, K.W. Cheng, C.T. Su	
Evaluation of tempering behaviour in modified 9Cr-1Mo steel by magnetic non-destructive techniques	669
H. Kumar, J.N. Mohapatra, R.K. Roy, R. Justin Joseyphus, A. Mitra	
Real-time diagnosis of melting and mixing processes in internal mixer by ultrasound	675
C.-C. Cheng	
Finite element simulation and experimental investigation of forming micro-gear with Zr-Cu-Ni-Al bulk metallic glass	684
D. Wang, T. Shi, J. Pan, G. Liao, Z. Tang, L. Liu	
Forming of thin-walled tubes into toroidal shells	689
L.M. Alves, P.A.F. Martins	
Filling modes of polymer during submicron and nano-fabrication near glass transition temperature	696
C. Liu, J.M. Li, Y. Liang, J. Peng, L.D. Wang	
A novel technique for reducing macrosegregation in heavy steel ingots	703
B. Sang, X. Kang, D. Li
