

SPECIAL ISSUE

INTERNET VISION

Edited by S. Avidan, S. Baker, and Y. Shan

- 1370 Scene Reconstruction and Visualization From Community Photo Collections**
By N. Snavely, I. Simon, M. Goesele, R. Szeliski, and S. M. Seitz
| INVITED PAPER | Recent progress is described in digitizing and visualizing the world from data captured by people taking photos and uploading them to the web.
- 1391 Infinite Images: Creating and Exploring a Large Photorealistic Virtual Space**
By B. Kaneva, J. Sivic, A. Torralba, S. Avidan, and W. T. Freeman
| INVITED PAPER | This proposed system uses 3-D-based navigation to browse large photo collections, and arrange them into themes, such as city streets or skylines, in a large image database.
- 1408 Toward Large-Scale Face Recognition Using Social Network Context**
By Z. Stone, T. Zickler, and T. Darrell
| INVITED PAPER | The authors of this paper believe that social incentives can be used to obtain numerous facial images of faces and they propose a computational method for using these images.
- 1416 Contextual Internet Multimedia Advertising**
By T. Mei and X.-S. Hua
| INVITED PAPER | Automated analysis of images is used to increase the effectiveness of advertising by maximizing the relevance of content and minimizing confusion about contextual information.
- 1434 It's All About the Data**
By T. L. Berg, A. Sorokin, G. Wang, D. A. Forsyth, D. Hoiem, I. Endres, and A. Farhadi
| INVITED PAPER | This paper explains how training data is important for many computer vision algorithms and presents case studies of how the Internet can be used to obtain high-quality data.
- 1453 Learning Object Categories From Internet Image Searches**
By R. Fergus, L. Fei-Fei, P. Perona, and A. Zisserman
| INVITED PAPER | This paper shows how the results returned by an image search engine can be used to construct models from Internet images and use them for object recognition.
- 1467 LabelMe: Online Image Annotation and Applications**
By A. Torralba, B. C. Russell, and J. Yuen
| INVITED PAPER | By developing a publicly available tool that allows users to use the Internet to quickly and easily annotate images, the authors were able to collect many detailed image descriptions.

DEPARTMENTS

- 1363 POINT OF VIEW**
 Cyber-Physical Systems: Close Encounters Between Two Parallel Worlds
By R. Poovendran
- 1367 SCANNING THE ISSUE**
 Internet Vision
By S. Avidan, S. Baker, and Y. Shan
- 1535 SCANNING OUR PAST**
 Electrical Engineering Hall of Fame: Harry Nyquist
By J. E. Brittain
- 1538 FUTURE SPECIAL ISSUES/SPECIAL SECTIONS**

On the Cover: This month's cover illustrates the wide variety of images and multimedia information available today to convey the concept of Internet Vision, which can be defined as the field at the intersection of Computer Vision and the Internet.

SPECIAL ISSUE: INTERNET VISION

1485 I2T: Image Parsing to Text Description

By B. Z. Yao, X. Yang, L. Lin, M. W. Lee, and S.-C. Zhu

| INVITED PAPER | The key component of this image parsing system is a database of annotated Internet data generated under the control of an independent organization.

1509 Image Interpretation Using Large Corpus: Wikipedia

By M. Rahurkar, S.-F. Tsai, C. Dagli, and T. S. Huang

| INVITED PAPER | This paper shows how to use the online Wikipedia encyclopedia to provide a method to represent high-level world knowledge in images.

1526 Vision of a Visipedia

By P. Perona

| INVITED PAPER | This paper envisions bringing together the knowhow and hard work of computer vision researchers into an online tool to form a repository of human understanding of visual imagery.
