

Optics & Laser Technology

26008 - 537C0005

Volume 42

Issue 1

February 2010

Contents

Review articles

- 1 Measurements of optical parameters of phantom solution and bulk animal tissues *in vitro* at 650 nm
P. Sun and Y. Wang
- 8 Laser treatment of Si-Al₂O₃ two-layer target
M. Vlasova, P.A. Márquez Aguilar, M.C. Reséndiz-González, M. Kakazey, I. González, V. Stetsenko, T. Tomila and A. Ragulya

Regular articles

- 18 High repetition rate mid-infrared generation with singly resonant optical parametric oscillator using multi-grating periodically poled MgO:LiNbO₃
N. Dixit, R. Mahendra, O.P. Naraniya, A.N. Kaul and A.K. Gupta
- 23 A parametric study of pulsed Nd:YAG laser micro-drilling of gamma-titanium aluminide
R. Biswas, A.S. Kuar, S. Sarkar and S. Mitra
- 32 Diffraction of plane waves by a black wedge
Y.Z. Umul
- 37 Theoretical prediction on the wavelength-temperature shift in pulsed TE CO₂ lasers
B. Xie and J. Wu
- 42 Study on fast linear scanning for a new laser scanner
S. Xiang, S. Cheh, X. Wu, D. Xiao and X. Zheng
- 47 Estimation of laser solid forming process based on temperature measurement
H. Tan, J. Chen, F. Zhang, X. Lin and W. Huang
- 55 Atmospheric turbulence and numerical evaluation of bit error rate (BER) in free-space communication
M.H. Maħdieh and M. Pourmoury
- 61 Reconstruction of three-dimensional arc-plasma temperature fields by orthographic and double-wave spectral tomography
Y. Gao, Q. Yu, W. Jiang and X. Wan
- 70 Enhancing the capabilities of binary phase only filter
V.K. Beri, A. Aran, S. Munshi, A.K. Gupta and V.K. Rastogi
- 81 A tunable single-passband microwave photonic filter with positive and negative taps using a fiber Mach-Zehnder interferometer and phase modulation
H. Fu, K. Zhu, H. Ou and S. He
- 85 Simulation and optimization of a polymer 2x2 multimode interference-Mach Zehnder interferometer electro-optic switch with push-pull electrodes
L. Gao, J. Sun, X. Sun, T. Li, W. Gao, Y. Yan and D. Zhang
- 93 Dual beam method for laser welding of galvanized steel: Experimentation and prospects
S. Iqbal, M.M.S. Gualini and A.u. Rehman
- 99 Coherence vortex evolution of partially coherent vortex beams in the focal region
P. Liu, H. Yang, J. Rong, G. Wang and Y. Yan
- 105 Design of broad omnidirectional total reflectors based on one-dimensional dielectric and magnetic photonic crystals
H. Qiang, L. Jiang and X. Li
- 110 A promising red-emitting phosphor for white-light-emitting diodes prepared by a modified solid-state reaction
F. Ren and D. Chen

Optics & Laser Technology

Volume 42

Issue 1

February 2010

Contents continued from outside back cover)

- 115 Tunable optical filter based on Sagnac phase-shift using single optical ring resonator
F.E. Seraji and F. Asghari
- 120 Optical transfer function of an optical system with a vortex phase mask in the presence of primary aberrations
R.K. Singh, P. Senthilkumaran and K. Singh
- 126 An improved windowed Fourier transform for fringe demodulation
C. Quan, H. Niu and C.J. Tay
- 132 A study of the radiation of a Nd:YAG laser–MIG hybrid plasma
Z. Li, W. Wang, X. Wang and H. Li
- 141 A new method of non-contact gauge block calibration using a fringe-counting technique: I. Theoretical basis
M. Dobosz and O. Iwasinska-Kowalska
- 149 A new method of noncontact gauge block calibration using the fringe counting technique: II. Experimental verification
O. Iwasinska-Kowalska and M. Dobosz
- 156 Study of interactions between liquid vortices and bubbles by simultaneous particle image velocimetry and laser-induced fluorescence tracking
R.Ž. Milenković, G. Yadigaroglu and B. Sigg
- 172 Features of formation of channels during laser treatment of AlN ceramics
P.A. Márquez Aguilar, M. Vlasova, M. Kakazey, D. Mayorga Cruz, E. Juarez Arellano, V. Stetsenko, T. Tomila and A. Ragulya
- 180 Cosine bend-linear waveguide digital optical switch with parabolic heater
I. Yulianti, A.S.M. Supa'at, S.M. Idrus and A.M. Al-hetar
- 186 Tight focusing of spirally polarized vortex beams
J. Pu and Z. Zhang
- 192 Effect of pump spectra and axial mode separation on the single longitudinal mode performance in end pumped solid-state lasers with semi-monolithic gain medium
J. George, S.M. Oak and B.P. Singh
- 198 Diode-pumped doubly Q-switched Nd:LuVO₄ laser with AO modulator and GaAs saturable absorber
K. Cheng, S.Z. Zhao, Y.F. Li, G.Q. Li, D.C. Li, K.J. Yang, J. An, G. Zhang, H.B. Ge and Z.G. Yu
- 202 Steady-state and transient Raman gain in magnetoactive narrow band-gap semiconductors
M. Singh, S. Redhu, S. Dahan and R.S. Pandey
- 208 Vibration-displacement measurements with a highly stabilised optical fiber Michelson interferometer system
F. Xie, J. Ren, Z. Chen and Q. Feng
- 214 Detection of liquid-level variation using a side-polished fiber Bragg grating
D. Xiaowei and Z. Ruifeng
- 219 Supersonic diffuser for pressure recovery in SCOIL system
G. Singhal, Mainuddin, R. Rajesh, R.K. Tyagi and A.L. Dawar
- 225 Analysis of the spectral variation of a dye laser by gain medium inhomogeneity
N. Singh
- 230 Nonlinear optical and optical power limiting studies on a new thiophene-based conjugated polymer in solution and solid PMMA matrix
P. Poornesh, P.K. Hegde, G. Umesh, M.G. Manjunatha, K.B. Manjunatha and A.V. Adhikari
- 237 Hybrid holographic-numerical method for modal analysis of complex structures
Y.Y. Hung, S.Y. Hung, Y.H. Huang, L. Liu and S.P. Ng

Technical note

- 243 Analysis of avalanche mechanisms in short-pulses laser-induced damage
X. Shang, R. Zhang and P. Ma

Erratum

- 247 Erratum to "Using Infrared thermography in order to compare laser and hybrid (laser+MIG) welding processes" [Optics & Laser Technology 41 (2009) 665–670]
S. Mattei, D. Grevey, A. Mathieu and L. Kirchner
