

Optics & Laser Technology

Volume 42

Issue 6

September 2010

Contents

- 855 Finite element analysis of laser irradiated metal heating and melting processes
D. Sowdari and P. Majumdar
- 866 A study of the influence of the input electrical power on the spectral width of the 510.6 nm line of an atomic copper vapor laser
N. Singh and H.S. Vora
- 873 Thermal lens measurements in a Nd:GdVO₄ self-Raman laser
Z. Wang, C. Du, S. Ruan and L. Zhang
- 878 Fractional vortex lens
S. Vyas, R. Kumar Singh and P. Senthilkumaran
- 883 Effect of photoconductivity and dielectric constant of the photorefractive materials on two-beam coupling gain and phase-shifts for a single unidirectional photorefractive ring resonator
M.K. Maurya and R.A. Yadav
- 894 Image restoration for interlaced scan CCD image with space-variant motion blurs
Z. Peng, N. Guo-Qiang and X. Ting-Fa
- 902 Out-of-plane ellipsometry measurements of nanoparticles on surfaces for thin film coated wafer inspection
C.-Y. Liu, T.-A. Liu and W.-E. Fu
- 911 Determination of the thickness of a transparent plate using a reflective fiber optic displacement sensor
D. Sastikumar, G. Gobi and B. Renganathan
- 918 Investigation of the efficient coupling between a highly elliptical Gaussian profile output from a laser diode and a single mode fiber using a hyperbolic-shaped microlens
H. Min Yang, C. Ting Chen, R. Ro and T. Chun Liang
- 927 Polarization-independent bidirectional 4 × 4 optical switch in free space
J. Yang, X. Li, J. Yang, J. Liu and X. Su
- 934 A simple dye-sensitized solar cell sealing technique using a CO₂ laser beam excited by 60 Hz AC discharges
D.-G. Lee, J.-T. Hong, G.-C. Xu, H.-S. Kim, K.-J. Lee, S.-J. Park, W.-Y. Kim and H.-J. Kim
- 941 Nanosecond zero-order pulsed Bessel beam generated from unstable resonator based on an axicon
B. Ma, F. Wu, W. Lu and J. Pu
- 945 Optimization of microcrystalline silicon thin film solar cell isolation processing parameters using ultraviolet laser
C.-F.J. Kuo, H.-M. Tu, S.-W. Liang and W.-L. Tsai
- 956 Nonlinear properties of polyurethane-urea/multi-wall carbon nanotube composite films
J. Wang, Y.-X. Fan, J. Chen, B. Gu and H.-T. Wang
- 960 Measurement of the bead profile and microstructural characterization of a CO₂ laser welded AISI 904 L super austenitic stainless steel.
P. Sathiya and M.Y. Abdul Jaleel
- 969 Elemental profiling and determination of Ti content of the beach sand samples of Bangladesh using LIBS technique
A.F.M.Y. Haider, M. Wahadoszamen, M.E. Sadat, K.M. Abedin and A.I. Talukder
- 975 Novel DFB laser structure suitable for stable single longitudinal mode operation
J.A.P. Morgado, C.A.F. Fernandes and J.B.M. Boavida
- 985 A study of process parameters during pulsed Nd:YAG laser notching of C70S6 fracture splitting connecting rods
L. Zheng, S. Kou, S. Yang, L. Li and F. Li
- 994 Spectroscopic study of nanocrystalline V₂O₅ · nH₂O films doped with Li ions
M.S. Al-Assiri, M.M. El-Desoky, A. Alyamani, A. Al-Hajry, A. Al-Mogeeth and A.A. Bahgat

Optics & Laser Technology

Volume 42

Issue 6

September 2010

Contents continued from outside back cover)

- 1004 An interferometric method for determining the mean refractive indices of highly birefringent fibres
M.A. El-Bakary
- 1010 Detection of physical defects in solar cells by hyperspectral imaging technology
Q. Li, W. Wang, C. Ma and Z. Zhu
- 1014 All-optical symmetric ternary logic gate
T. Chattopadhyay
- 1022 The effect of material thickness, laser power and cutting speed on cut path deviation in high-power diode laser chip-free cutting of glass
S. Nisar, M.A. Sheikh, L. Li and S. Safdar
- 1032 Optimum design for maximum wavelength resolution for an edge filter-based ratiometric system
Q. Wu, G. Rajan, P. Wang, Y. Semenova and G. Farrell
- 1038 Signal processing of laser Doppler self-velocimeter
J. Zhou and X. Long
- 1044 Polarization dependence of an edge filter based on singlemode-multimode-singlemode fibre
A.M. Hatta, Y. Semenova, G. Rajan and G. Farrell
- 1049 Influence of different interfaces on laser propulsion in water environment
B. Han, J. Chen, H.-C. Zhang, Z.-H. Shen, J. Lu and X.-W. Ni
- 1054 Effective radius of curvature of Hermite-Gaussian array beams
G. Ji and X. Ji
