Multiple Time Scalings of a Multi-Output Observer Form ............................... Y. Wang and A. F. Lynch 966
Time Complexity of Decentralized Fixed-Mode Verification .......................... J. Lavaei and S. Sojoudi 971
The Carleman Approximation Approach to Solve a Stochastic Nonlinear Control Problem .......................................................... G. Mavelli and P. Palumbo 976
High Gain Observer for Structured Multi-Output Nonlinear Systems ................ H. Hammouri, G. Bornard, and K. Busawon 987
Efficient LMI-Based Quadratic Stabilization of Interval LPV Systems With Noisy Parameter Measures ..................................................... L. Jetto and V. Orsini 993
Assessing Asymptotic Stability of Linear Continuous Time-Varying Systems by Computing the Envelope of all Trajectories ................................. G. Garcia, P. L. D. Peres, and S. Tarbouriech 998
Synthesis of Linear Quantum Stochastic Systems via Quantum Feedback Networks ................................. H. I. Nurdin 1008
Structural Instability and Minimal Realizations .............................................. L. H. Keel and S. P. Bhattacharyya 1014
Sensitivity Penalization Based Robust State Estimation for Uncertain Linear Systems ................................................................. T. Zhou 1018
Further Results on the Uniform Observability of Discrete-Time Nonlinear Systems ................................................................. S. Harba 1034
An Extension to Balanced Truncation With Application to Structured Model Reduction ................................................................. H. Sandberg 1038
