SPECIAL SECTION ON ELECTRONIC DEVICES AND SYSTEMS IN HARSHE ENVIRONMENTS

Guest Editorial ........................................ R. N. Dean, P. Lall, M. Nowotnick, and W. R. Harrell 2579

SPECIAL SECTION PAPERS

A Low-Cost Solution for Deploying Processor Cores in Harsh Environments ........................................ M. Violante, C. Meinhardt, R. Reis, and M. Sonza Reorda 2617

Evaluation of the Hardware for a Mobile Measurement Station ........................................ B. Dziadak and A. Michalski 2627

Robust BME Class-I MLCCs for Harsh-Environment Applications ........................................ X. Xu, A. S. Gurav, P. M. Lessner, and C. A. Randall 2636

Analysis and Control of Nonsalient Permanent Magnet Axial Gap Self-Bearing Motor ........................................ Q. D. Nguyen and S. Ueno 2644

Industrial Fieldbus Improvements in Power Distribution and Conducted Noise Immunity With No Extra Costs ........................................ A. Menéndez, A. Barbancho, E. Personal, and D. F. Larios 2653

Long-Term Reliability of Railway Power Inverters Cooled by Heat-Pipe-Based Systems ........................................ X. Perpiñà, X. Jordà, M. Vellvehi, J. Rebolleda, and M. Mermert-Guyennet 2662

Packaging Technology for Electronic Applications in Harsh High-Temperature Environments ........................................ P. Hugler, P. Henson, and R. W. Johnson 2673

Reliability Estimation of Three Single-Phase Topologies in Grid-Connected PV Systems ........................................ F. Chin and H. Caticja 2683

Fully Integrated High-Isolation Low-Loss Digitally Controlled MEMS Filters ........................................ K. Ma, R. M. Jayasurya, and D. R. Lim Chin Siong 2690

Electrical Noise in MEMS Capacitive Elements Resulting From Environmental Mechanical Vibrations in Harsh Environments ........................................ R. N. Dean, A. Anderson, S. J. Reeves, G. T. Flowers, and A. S. Hodel 2697

(Contents Continued on Page 2577)
Design and Test of an HV-CMOS Intelligent Power Switch With Integrated Protections and Self-Diagnostic for Harsh Automotive Applications

A Smart Skin PVC Foil Based on FBG Sensors for Monitoring Strain and Temperature

ESD-Protected Power Amplifier Design in CMOS for Highly Reliable RF ICs

X. Wang, X. Guan, S. Fan, H. Tang, H. Zhao, L. Lin, Q. Fang, J. Liu, A. Wang, and L. Yang

PAPERS

Multiphase Systems

Low-Speed Control Improvements for a Two-Level Five-Phase Inverter-Fed Induction Machine Using Classic Direct Torque Control

Applying Differential-Mode Transformer to Current Sharing With Current Ripple Considered

K. J. Hwu and Y. H. Chen

Machines and Drives

A Natural Soft-Commutation PWM Scheme for Current Source Converter and Its Logic Implementation

Shaping the Noise Spectrum in Power Electronic Converters

Switching Ripple Characteristics of Space Vector PWM Schemes for Five-Phase Two-Level Voltage Source Inverters—Part 1: Flux Harmonic Distortion Factors

Switching Ripple Characteristics of Space Vector PWM Schemes for Five-Phase Two-Level Voltage Source Inverters—Part 2: Current Ripple

Suppression of Saturation Effects in a Sensorless Predictive Controlled Synchronous Reluctance Machine Based on Voltage Space Phasor Injections

Design Considerations for a Fault-Tolerant Flux-Switching Permanent-Magnet Machine

Switching Frequency Reduction Using Model Predictive Direct Current Control for High-Power Voltage Source Inverters

Steady-State and Dynamic State-Space Model for Fast and Efficient Solution and Stability Assessment of ASDs

A Simple Method to Reduce Torque Ripple in Direct Torque-Controlled Permanent-Magnet Synchronous Motor by Using Vectors With Variable Amplitude and Angle

Single-Phase Electronics

Optimizing Universal Ballasts Using Magnetic Regulators and Digital Control

SIC versus Si—Evaluation of Potentials for Performance Improvement of Inverter and DC–DC Converter Systems by SIC Power Semiconductors

Design of Robust Digital PID Controller for H-Bridge Soft-Switching Boost Converter

Single-Switch High-Power-Factor Inverter Driving Piezoelectric Ceramic Transducer for Ultrasonic Cleaner

Circuit-Model-Based Analysis of a Wireless Energy-Transfer System via Coupled Magnetic Resonances

An Improved LLC Resonant Inverter for Induction-Heating Applications With Asymmetrical Control

An Isolated DC/DC Converter Using High-Frequency Unregulated LLC Resonant Converter for Fuel Cell Applications

A Correlation-Based Islanding-Detection Method Using Current-Magnitude Disturbance for PV System

Renewable Energy Systems

A Magnetoelectric Composite Energy Harvester and Power Management Circuit

Analysis and Implementation of a Dual Resonant Converter

Analysis and Implementation of a ZVS/ZCS DC–DC Switching Converter With Voltage Step-Up

ZVS Resonant Converter With Parallel–Series Transformer Connection
