THIS WEEK

EDITORIALS

279 METRICS

Unit of contention

It is time for the US to adopt SI units for radiation measurements

279 POLITICS

No way out

Adlène Hicheur deserves a full and fair hearing over his deportation

280 EPIDEMIOLOGY

Bowled over

Sewage sifters dish the dirt on drug use

WORLD VIEW

281 Illusory fears must not stifle chimaera research

Insoo Hyun

Human-animal embryos have huge biomedical potential

RESEARCH HIGHLIGHTS

282 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Brewer's yeast / Nanoparticles target resistant bacteria / A boost for black phosphorus / Hawaiian bird life

SEVEN DAYS

284 THE NEWS IN BRIEF

Nuclear test in North Korea / DeepMind mimics human speech / Flatworm named after Barack Obama / Humpback whales back from the brink

CAREERS

437 INDUSTRY

Open for business

An industrial postdoc position can be an education in itself

439 TURNING POINT

Activist engineer

Having confirmed lead contamination in the water supply for Flint, Michigan, Marc Edwards has worked to find out how it happened

NATUREJOBS ADVERTISING FEATURE

Spotlight on postdocs

NEWS IN FOCUS

287 POLITICS

Protest over physicist's unexplained deportation from Brazil

288 MEDICAL RESEARCH

Wishlist of goals drawn up for US cancer 'moonshot'

289 ETHICS

Nobel panel drawn into surgical scandal at Swedish institute

290 BIOLOGY

Geneticists stick their necks out to say giraffes are four species, not one

291 PUBLIC HEALTH

Ebola virus lingers for an unexpectedly long time in the body

292 GAIA SPACECRAFT

Map of Milky Way set to change the face of astronomy

FEATURES

294 HEALTH

The office experiment

Can science create the ideal workplace?

SOIL SCIENCE

A hidden world

Diana Wall has devoted her life to studying the rich ecosystems in the earth beneath our feet **PAGE 298**

TECHNOLOGY

433 CELL CULTURE

Reproducibility: Respect your cells!

From cell identity to serum quality and physical environment, there are plenty of cell-culture variables to keep track of

COMMENT

AGRICULTURE

Growth industry

Shifts in R&D spending will change food production, say Philip G Pardey, Connie Chan-Kang, Steven P Dehmer & Jason M Beddow **PAGE 301**

BOOKS & ARTS

304 TECHNOLOGY

Selfies in space

Alexandra Witze

305 BOOKS IN BRIEF

306 DENDROLOGY

The community of trees

Richard Fortey

CORRESPONDENCE

307 Embrace private ownership of fossils / Photographic taxonomy / Sponge cities in China / Coral reefs destroyed / Do author lists make sense?

OBITUARY

308 Seymour Papert (1928–2016)

Gary S Stager

FUTURES

442 A perfect medium for unrequited love
Alex Shvartsman

CONTENTS

15 September 2016 / Vol 537 / Issue No 7620

RESEARCH

NEW ONLINE

309 Papers published this week at nature.com

NEWS & VIEWS

310 EARTH SCIENCE

Extraordinary world

Earth's isotopic composition is broadly chondritic
James M D Day

SEE LETTERS P.394 & P.399

311 EVOLUTION

Teenage tetrapods

Fossil-bone analysis raises questions about tetrapod growth
Nadia B Fröbisch

SEE LETTER P.408

312 IMMUNOLOGY

Cytotoxic T cells that escape exhaustion

Identification of a T-cell subset that might control chronic viral infection
Cindy S Ma & Stuart G Tangye

SEE LETTERS P.412 & P.417

314 GENOMICS

Geography matters for *Arabidopsis*

Results from the *Arabidopsis* 1001 Genomes Project
Outi Savolainen & Martin Lascoux

315 MATERIALS SCIENCE

Not so creepy under stress

Nanocrystalline alloy that has high-temperature creep resistance
Jonathan Cormier

SEE LETTER P.378

316 AGEING

Dietary protection for genes

Diet restriction extends lifespan in mice that have DNA-repair defects
Junko Oshima & George M Martin

SEE LETTER P.427

ARTICLES

357 NEUROSCIENCE Locus coeruleus and dopaminergic consolidation of everyday memory

T Takeuchi et al.

363 STRUCTURAL BIOLOGY Activation mechanism of endothelin ET_B receptor by endothelin-1

W Shihoya et al.

369 EPIGENETICS m⁶A RNA methylation promotes XIST-mediated transcriptional repression

D P Patil et al.

ON THE COVER

Hidden talent

A Hawaiian crow using a stick tool to extract food from a wooden log. Birds in the crow family are renowned for their cognitive abilities. The New Caledonian crow *Corvus moneduloides* is well known for its ability to make and use foraging tools. A species-wide study shows that the Hawaiian crow *Corvus hawaiiensis*, better known by its indigenous Hawaiian name 'Alalā, is a highly proficient tool user, creating opportunities for comparative studies with tool-using New Caledonian crows and other corvids. **PAGE 403**

LETTERS

374 ASTROPHYSICS A radio-pulsing white dwarf binary star

T R Marsh et al.

378 MATERIALS SCIENCE Extreme creep resistance in a microstructurally stable nanocrystalline alloy

K A Darling et al. **SEE N&V P.315**

382 MATERIALS SCIENCE Enhanced electrocatalytic CO₂ reduction via field-induced reagent concentration

M Liu et al.

387 CHEMISTRY Catalytic enantioselective 1,6-conjugate additions of propargyl and allyl groups

F Meng et al.

394 GEOCHEMISTRY A nucleosynthetic origin for the Earth's anomalous ¹⁴²Nd composition

C Burkhardt et al. **SEE N&V P.310**

399 GEOCHEMISTRY Primitive Solar System materials and Earth share a common initial ¹⁴²Nd abundance

A Bouvier & M Boyet **SEE N&V P.310**

403 BEHAVIOURAL ECOLOGY Discovery of species-wide tool use in the Hawaiian crow

C Rutz et al.

408 EVOLUTION Life history of the stem tetrapod *Acanthostega* revealed by synchrotron microtomography

S Sanchez, P Tafforeau, J A Clack & P E Ahlberg **SEE N&V P.311**

412 IMMUNOLOGY Follicular CXCR5-expressing CD8⁺ T cells curtail chronic viral infection

R He et al. **SEE N&V P.312**

417 IMMUNOLOGY Defining CD8⁺ T cells that provide the proliferative burst after PD-1 therapy

S J Im et al. **SEE N&V P.312**

422 CANCER A PGC1 α -mediated transcriptional axis suppresses melanoma metastasis

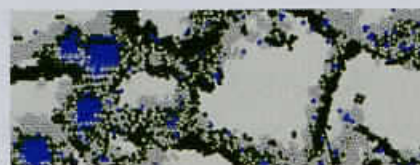

C Luo et al.

427 AGEING Restricted diet delays accelerated ageing and genomic stress in DNA-repair-deficient mice

W P Vermeij et al. **SEE N&V P.316**

432 CORRIGENDUM Convergence of terrestrial plant production across global climate gradients

S T Michaletz, D Cheng, A J Kerkhoff & B J Enquist

MATERIALS SCIENCE

Stay strong

A high-strength Cu-Ta alloy with extreme creep resistance. **PAGE 378**

KEN BOHN/SAN DIEGO ZOO GLOBAL
