THIS WEEK

EDITORIALS

139 MENTAL HEALTH

Healing traumatized minds

Address mental-health disorders among migrants to aid integration

140 GENOMICS

Genetic reckoning

Time to rethink the links between genetic mutations and disease

140 SCIENCE AND SOCIETY

Buzzword off

Choose your words with care when trying to encapsulate a concept

WORLD VIEW

141 It's time to get real about conservation

Aaron M Ellison

Political engagement is the only way to save endangered species

RESEARCH HIGHLIGHTS

142 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Helpful protozoa / Mind-reading apes / Colorado megadrought / Sinking diatoms / Oceans on a third Saturnian moon / Forests feeling the heat

SEVEN DAYS

144 THE NEWS IN BRIEF

Ukraine joins CERN / Hurricane sparks cholera fears / Gender imbalance in telescope time / Deal struck on aviation emissions

CAREERS

279 VOLUNTEERING

Pro bono science

Working for nothing can be rewarding — as long you like what you are doing

281 TRADE TALK

Lab whiz

Neurobiologist Stefanie Marquez-Vilendrer's advice to postdocs is to 'get out more'

NATUREJOBS ADVERTISING FEATURE

Spotlight on genetics

NEWS IN FOCUS

147 POLITICS

UK scientists fear government's toughened stance on immigration

148 POPULATION STUDIES

Africa's largest health project to track half a million citizens

149 PLANETARY SCIENCE

NASA contemplates time-share approach to Mars exploration

150 DRUG DEVELOPMENT

Researchers race to reduce toxicity of promising cancer therapy

152 EDUCATION

Academic origins of Nobel laureates revealed

152 NANOTECHNOLOGY

Miniature molecular machines win chemistry Nobel

FEATURES

154 GENETICS

Seeing deadly mutations in a new light

How genetic data are rewriting the established view of disease risk

PSYCHIATRIC DISORDERS

Minds of migrants

High rates of mental-health disorders in Europe's migrants and refugees

PAGE 158

TECHNOLOGY

275 GENE REGULATION

The dark side of the human genome

With CRISPR-Cas9 gene-editing added to the toolkit, the secrets of gene expression are now being revealed

COMMENT

EQUALITY

Genomic imbalance

Analysis reveals genome-wide association studies are still biased to those of European descent, say Alice B Popejoy & Stephanie M Fullerton

PAGE 161

165 URBAN DEVELOPMENT

Scientists must have a say in the future of cities

Timon McPhearson et al.

To achieve sustainability in an urbanized world, researchers need to work together

BOOKS & ARTS

168 PHYSICS

Fallible pontiff of physics

Graham Farmelo

169 BOOKS IN BRIEF

170 HISTORY

Einstein the statesman

Nancy Thorndike Greenspan

CORRESPONDENCE

171 Irreproducibility does not equate to misconduct / PhD-free research / Don't subsidize fossil fuel / Fish farms for all?

OBITUARY

172 Roger Yonchien Tsien (1952–2016)

Timothy J Rink, Louis Y Tsien & Richard W Tsien

FUTURES

284 Galactic Empire Management

Consulting: lessons learnt

Aidan Doyle

ON THE COVER

Moving on

Three international collaborations reporting in this issue describe 787 high-quality genomes from individuals from geographically diverse populations. The data give the clearest view yet of historical human migration, and inform improved models of genetic mixing between modern humans and their hominin relatives including the Neanderthals and Denisovans. [PAGES 179, 201, 207 & 238](#)

populations
