FUTURE GENERATIONS

EDITORIAL

- 381 Generation game**
Plot a course for tomorrow

WORLD VIEW

- 383 Can today's decisions really be future-proofed?**
Céline Kermisch
Time plays a key part in how policies affect the future

FEATURES

- 397 Future generations**
What kind of world will we pass on?

- 398 Tomorrow's world**
Technology will create a future that we can barely imagine

- 402 Tomorrow's children**
Will genome editing really be a panacea?

COMMENT

- 407 Current climate models are grossly misleading**
Nicholas Stern
Scientists need to help policymakers understand the risks
- 409 Slow down population growth**
John Bongaarts
All women should have access to quality contraception
- 413 Game human nature**
Helga Fehr-Duda & Ernst Fehr
Adapt natural tendencies and nudge collective action

A Nature special issue nature.com/futuregenerations

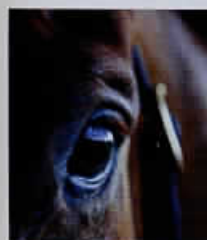

THIS WEEK

EDITORIALS

- 381 CLINICAL TRIALS**
Safety first
The US must do better on research involving human subjects
- 382 GLOBAL WARMING**
Climate changes
Personnel changes must not affect emissions progress

RESEARCH HIGHLIGHTS

- 384 SELECTIONS FROM THE SCIENTIFIC LITERATURE**

Nacre-like graphene / Super-Earth atmosphere / Rotary DNA / Insulin-making organoid / Carbon-capture downside / Horse play / Shady hominins

SEVEN DAYS

- 386 THE NEWS IN BRIEF**
Fracking challenged in court / Marcia McNutt elected president of National Academy of Sciences / Sentinel satellite takes to the skies / NASA gives green light to Wide Field Infrared Survey Telescope

NEWS IN FOCUS

- 389 PUBLIC HEALTH**
Sales of synthetic malaria drug fall flat
- 391 BIOMEDICAL SCIENCE**
Cancer institute rejuvenates its cell lines
- 392 CONSERVATION**
Near real-time deforestation alerts
- 393 POLAND**
Ancient forest under threat from logging
- 394 AUSTRALIA**
Bill proposes banning imported monkeys
- 394 PSYCHOLOGY**
Orders help absolve responsibility

CAREERS

- 505 ACTIVISM**
Frustrated postdocs rise up
Many US postdocs, tired of low pay and poor prospects, are spoiling for a fight
- 507 COLUMN**
Changes on the ice
Astronomer Robin Bell encounters a dazzling array of scientific disciplines in Antarctica

NATUREJOBS ADVERTISING FEATURE
Spotlight on postdoctoral positions

COMMENT

BOOKS & ARTS

- 416 EVOLUTION**
Doing the locomotion
Kevin Padian
- 417 BOOKS IN BRIEF**
- 418 HISTORY OF SCIENCE**
When eugenics became law
Victoria Nourse

CORRESPONDENCE

- 419** Startling flight plans / Early forests threatened / Research bias / Mosquito swarm

FUTURES

- 510 Duck, duck, duck**
Samantha Murray

COVER ILLUSTRATION BY ANNA PARINI

CONTENTS

25 February 2016 / Vol 530 / Issue No 7591

RESEARCH

NEW ONLINE

- 421 Papers published AOP this week at nature.com

NEWS & VIEWS

422 AUTOIMMUNITY

Antigen-specific immunotherapy

Peptide-coated nanoparticles for suppressing autoimmune disease
David Wraith

SEE ARTICLE P.434

423 EPIGENETICS

A new methyl mark on messengers

The m¹A modification of adenine in messenger RNA
Anna M Kietrys & Eric T Kool

SEE ARTICLE P.441

425 PALAEOANTHROPOLOGY

What teeth tell us

Predicting tooth size in extinct hominins
Aida Gómez-Robles

SEE LETTER P.477

426 CLIMATE SCIENCE

Hidden trends in the ocean carbon sink

Anthropogenic changes in the air-ocean flux of CO₂ are currently hidden
Tatiana Ilyina

SEE LETTER P.469

427 COSMOLOGY

Home of a fast radio burst

The point of origin of an astrophysical phenomenon
Duncan Lorimer

SEE LETTER P.453

ARTICLES

429 EVOLUTIONARY GENETICS

Ancient gene flow from early modern humans into Eastern Neanderthals

M Kuhlwilm et al.

434 IMMUNOLOGY

Expanding antigen-specific regulatory networks to treat autoimmunity

X Clemente-Casares et al.

SEE N&V P.422

441 EPIGENETICS

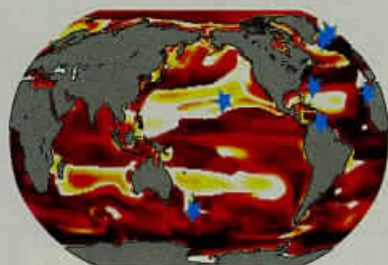

The dynamic N¹-methyladenosine methylome in eukaryotic messenger RNA

D Dominissini et al.

SEE N&V P.423

447 EPIGENETICS

Structural basis for

BIOGEOCHEMISTRY

The long view

Internal climate variability is masking the rate of change in anthropogenic carbon uptake in the oceans — at least for now. **PAGE 469**

activity regulation of MLL family methyltransferases
Y Li et al.

LETTERS

453 COSMOLOGY

The host galaxy of a fast radio burst

E F Keane et al.

SEE N&V P.427

457 QUANTUM PHYSICS

Non-destructive state detection for quantum logic spectroscopy of molecular ions

F Wolf et al.

461 CONDENSED-MATTER PHYSICS

Possible light-induced superconductivity in K₃C₆₀ at high temperature

M Mitrano et al.

465 INORGANIC CHEMISTRY

A pentanuclear iron catalyst designed for water oxidation

M Okamura et al.

469 BIOGEOCHEMISTRY

Timescales for detection of trends in the ocean carbon sink

G A McKinley et al.

SEE N&V P.426

473 SOCIAL EVOLUTION

Third-party punishment as a costly signal of trustworthiness

J J Jordan, M Hoffman, P Bloom & D G Rand

477 PALAEOANTHROPOLOGY

A simple rule governs the evolution and development of hominin tooth size

A R Evans et al.

SEE N&V P.425

481 NEUROSCIENCE

Adult restoration of *Shank3* expression rescues selective autistic-like phenotypes

Y Mei et al.

485 MICROBIOLOGY

Inhibiting fungal multidrug resistance by disrupting an activator-Mediator interaction

J L Nishikawa et al.

490 CANCER METABOLISM

Tumour-specific proline vulnerability uncovered by differential ribosome codon reading

F Loayza-Puch et al.

495 DEVELOPMENTAL BIOLOGY

Epithelial tricellular junctions act as interphase cell shape sensors to orient mitosis

F Bosveld et al.

499 STRUCTURAL BIOLOGY

Structural basis for promiscuous PAM recognition in type I-E Cascade from *E. coli*

R P Hayes et al.

504 CORRIGENDUM

NLRP10 is a NOD-like receptor essential to initiate adaptive immunity by dendritic cells

S C Eisenbarth et al.

CELL BIOLOGY

Triple lock

How three-cell junctions act to help determine cell-shape directionality.
