3 March 2016 / Vol 531 / Issue No 7592

THIS WEEK

EDITORIALS

7 POLICY

Unintended consequences

UK rule must not muzzle researchers

7 SUSTAINABILITY

Future present

Future Earth platform should be able to deliver advice to policymakers

8 MEDICAL TECHNOLOGY

Brain power

Time to consider the wider uses of brain stimulation

WORLD VIEW

9 Stop needless dispute of science in the courts

David Neuberger

Primers could avoid time being wasted on debating basic points

RESEARCH HIGHLIGHTS

10 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Homo in Africa / Asymmetry in the genes / Raccoons off their food / Replication, replication, replication / Antarctic ice retreat / Cosmic voids

SEVEN DAYS

12 THE NEWS IN BRIEF

Illumina sues nanopore firm / Brain prize / Deepwater Horizon acquittal / Ebola trial stumbles

CAREERS

129 LAB LIFE

Lone-parent scientist

Single parents often need to build their own support network with little help from cash-strapped institutions

131 TURNING POINT

Gun-crime analyst

Emergency-department physician Garen Wintemute needs to be resourceful to fund his research on the effects of US gun violence

NEWS IN FOCUS

15 CLIMATE CHANGE

Arctic sea ice retreats in face of warm winter

16 BIOTECHNOLOGY

India's budget offers hope for nascent genomics hub

18 POLITICS

Austere budget paralyzes attempts to modernize Ukrainian science

19 PUBLIC HEALTH

Zika response builds on lessons from Ebola outbreak

20 GRAVITATIONAL WAVES

Planned space-based detector passes first major hurdle

20 CLIMATE

Researchers scramble to collect data on waning El Niño

FEATURES

22 ENERGY

Can fracking power Europe?

The bid to ape the United States and tap into natural-gas reserves is proving less successful than hoped

26 MATERIALS SCIENCE

The nanoscale rainbow

Virus-sized particles promise a colourful revolution

TOOLBOX

127 GETTING PUBLISHED

The manuscript-editing marketplace

English-language author services get the peer-to-peer website treatment

128 EXPERIMENTATION

Better designs for animal studies

Good experiment design minimizes animal use and a new web tool can help achieve it

COMMENT

POLICY

Fukushima after 5 years

Japan's energy research needs a global, interdisciplinary perspective, argue Masahiro Sugiyama *et al.* [PAGE 29](#)

BOOKS & ARTS

32 PUBLIC HEALTH

Tracing the social roots of health

Andrew Steptoe

33 BOOKS IN BRIEF

34 ECOLOGY

Biology distilled

Brian J Enquist

CORRESPONDENCE

- 35 Why Japan's whale research is scientific / NIH tackling sexual harassment / Problems with Australian primate bill / Transparency is complicated

FUTURES

134 Ajdenia

Natalia Theodoridou

CONTENTS

3 March 2016 / Vol 531 / Issue No 7592

RESEARCH

NEW ONLINE

- 37 Papers published AOP this week at nature.com

NEWS & VIEWS

38 ORGANIC CHEMISTRY

Reactions triggered electrically

Reaction rates accelerated by electric fields

Limin Xiang & N.J. Tao

SEE LETTER P.88

39 EVOLUTION

Mitochondria in the second act

A 'mito-intermediate' model for the evolution of eukaryotic cells

Thijs J.G. Ettema SEE LETTER P.101

40 GRAVITATIONAL WAVES

Dawn of a new astronomy

The historic detection of gravitational waves

M. Coleman Miller

42 STEM CELLS

Dietary fat promotes intestinal dysregulation

A high-fat diet promotes stemness in intestinal progenitors in mice

Chi Luo & Pere Puigserver

SEE ARTICLE P.53

43 SPACE SCIENCE

Cosmic rays beyond the knees

A radio technique that determines the composition of cosmic rays

Andrew M. Taylor SEE LETTER P.70

44 REGENERATION

Stem cells make the bowel nervous

Regenerating the enteric nervous system in a Hirschsprung-disease model

Robert O. Heuckeroth SEE LETTER P.105

ARTICLES

47 CANCER GENOMICS

Genomic analyses identify molecular subtypes of pancreatic cancer

P. Bailey et al.

53 CANCER METABOLISM

High-fat diet enhances stemness and tumorigenicity of intestinal progenitors

S. Beyaz et al. SEE N&V P.42

59 MICROBIOLOGY

Priming and polymerization of a bacterial contractile tail structure

A. Zoued et al.

64 STRUCTURAL BIOLOGY

Structural basis of outer membrane protein insertion by the BAM complex

Y. Gu et al.

LETTERS

70 HIGH-ENERGY ASTROPHYSICS

A large light-mass component of cosmic rays at 10^{17} – $10^{17.5}$ electronvolts from radio observations

S. Buitink et al. SEE N&V P.43

74 QUANTUM OPTICS

Controlling spin relaxation with a cavity

A. Bienfait et al.

78 MATERIALS SCIENCE

Condensation on slippery asymmetric bumps

K.-C. Park et al.

83 CHEMISTRY

Stable amorphous georgite as a precursor to a high-activity catalyst

S. A. Kondrat et al.

88 CHEMISTRY

Electrostatic catalysis of a Diels–Alder reaction

A. C. Aragonès et al. SEE N&V P.38

92 SEISMOLOGY

Upper-plate controls on co-seismic slip in the 2011 magnitude-9.0 Tohoku-oki earthquake

D. Bassett, D. T. Sandwell, Y. Fialko & A. B. Watts

97 EVOLUTIONARY BIOLOGY

Evidence from cyclostomes for complex regionalization of the ancestral vertebrate brain

F. Sugahara et al.

101 EVOLUTIONARY BIOLOGY

Late acquisition of mitochondria by a host with chimaeric prokaryotic ancestry

A. A. Pittis & T. Gabaldón

SEE N&V P.39

105 REGENERATIVE MEDICINE

Deriving human ENS lineages for cell therapy and drug discovery in Hirschsprung disease

F. Fattahi et al. SEE N&V P.44

110 CANCER METABOLISM

Mutant Kras copy number defines metabolic reprogramming and therapeutic susceptibilities

E. M. Kerr et al.

114 VIROLOGY

Cryo-electron microscopy structure of a coronavirus spike glycoprotein trimer

A. C. Walls et al.

118 VIROLOGY

Pre-fusion structure of a human coronavirus spike protein

R. N. Kirchdoerfer et al.

122 STRUCTURAL BIOLOGY

Crystal structure of eukaryotic translation initiation factor 2B

K. Kashiwagi et al.

126 CORRIGENDUM

Acute stress facilitates long-lasting changes in cholinergic gene expression

D. Kaufer et al.

126 CORRIGENDUM

Identification of the pollen self-incompatibility determinant in *Papaver rhoeas*

M. J. Wheeler et al.

126 CORRIGENDUM

A SUMOylation-defective MITF germline mutation predisposes to melanoma and renal carcinoma

C. Bertolotto et al.

IRIS JOVAL / TONI GABALDÓN

COGNITIVE HEALTH

natureOUTLOOK

Pushing the limits
of brain power

Turn to page 46

S1 EDITORIAL

Cognitive health
Michelle Grayson

S2 SMART DRUGS

A dose of intelligence
Effectiveness of the drugs is debatable

S4 AGEING

Restoration project
Efforts to prevent cognitive decline

S6 NEUROSTIMULATION

Bright sparks
The rise of DIY brain stimulation

S9 PERSPECTIVE

Time to expand the mind
Technology could improve mental ability,
say Nicholas Fitz and Peter Reiner

S10 BRAIN TRAINING

Memory games
Conflicting results in a controversial field

Neurobiologist Flavio Frohlich demonstrates transcranial direct-current stimulation (S6).

S12 BRAIN FOOD

Clever eating
Do we still need to eat meat?

S14 SOCIAL NETWORKS

Better together
The benefits of forming relationships

S16 NEURAL MODELLING

Abstractions of the mind
Keeping brain models relevant

S18 NEUROBIOLOGY

Rise of resilience
The biology behind withstanding stress
