THIS WEEK

EDITORIALS

127 ASTRONOMY

Under new management

Radio-burst boon for mysterious benefactor of Arecibo telescope

127 POLICY

Science at sea

Ocean-treaty agreement a rare diplomatic breakthrough

128 CHEMICAL BIOLOGY

In the jeans

GM bacteria used to make denim dye

WORLD VIEW

129 Funders should mandate open citations

David Shotton

Extend free access to references

RESEARCH HIGHLIGHTS

130 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Dinosaur dinners / Island melting pots / China's emissions / Scaly spiders / Tarantula nebula / Stem-cell success

SEVEN DAYS

132 THE NEWS IN BRIEF

Science views / Typhoid vaccine / Climate panel revived / Astronaut dies / Offshore drilling / AI hub

CAREERS

239 HEALTH

Science and sickness

Finding a balance between managing chronic illness and a research career

241 CAREER BRIEFS

NEWS IN FOCUS

135 SPACE SCIENCE

Scientific ballooning heads for the stratosphere

136 COMPUTING

Silicon plays catch-up in quantum-computing race

137 PUBLISHING

Elsevier continues access in Germany

138 PALAEOLOGY

Pterosaur teeth hint at diet

139 INDONESIA

Country's preprint server gains momentum

138 CLIMATE SCIENCE

'Blue carbon' defies expectations in US soil survey

FEATURES

142 BEYOND THE STANDARD MODEL

Tabletop physics pushed to the edge

The hunt for new particles turns to low-energy techniques

NEUROSCIENCE

Portrait of a memory

Neuroscientists scour brains for mechanisms of memories **PAGE 146**

COMMENT

SPACE

Exoplanet science 2.0

The search for new worlds needs interdisciplinarity, say Caleb Scharf, Debra Fischer & Victoria Meadows **PAGE 149**

BOOKS & ARTS

152 SUSTAINABILITY

Duel for the future

Adam Rome

153 BOOKS IN BRIEF

154 HISTORY

Science and suffrage

Elizabeth Bruton

CORRESPONDENCE

155 Gene drive / Breast cancer / Climate targets / Publishing proposal

FUTURES

244 A street but half made up

Anna Zumbro

CONTENTS

11 January 2018 / Vol 553 / Issue No 7687

RESEARCH

NEW ONLINE

157 Papers published this week at nature.com

NEWS & VIEWS

158 PLANETARY SCIENCE

Cometary spin-down

The observation of a rapid decrease in a comet's rotation rate

Jessica Agarwal [SEE LETTER P.186](#)

159 NEUROSCIENCE

Neuronal plasticity in nematode worms

A rare example of neuronal plasticity in *Caenorhabditis elegans*

Scott W Emmons [SEE ARTICLE P.165](#)

160 ORGANOMETALLIC CHEMISTRY

Dogma-breaking catalysis

Hydrogenation catalysts derived from alkaline-earth metals

Douglas W Stephan

162 BIOTECHNOLOGY

An ode to gene edits that prevent deafness

Gene editing stops hearing loss in a mouse model of inherited deafness

Fyodor Urnov [SEE LETTER P.217](#)

163 MATERIALS SCIENCE

Rule-breaking perovskites

Lead halide perovskites emit light through bright triplet excitons

Michele Saba [SEE LETTER P.189](#)

ARTICLES

165 NEUROSCIENCE Neurexin controls plasticity of a mature, sexually dimorphic neuron

M P Hart & O Hobert [SEE N&V P.159](#)

171 STEM CELLS Alcohol and endogenous aldehydes damage chromosomes and mutate stem cells

J I Garaycoechea et al.

LETTERS

178 ASTRONOMY Rotation in [C II]-emitting gas in two galaxies at a redshift of 6.8

R Smit et al.

182 ASTROPHYSICS An extreme magnetospheric environment associated with the fast radio burst source FRB 121102

D Michilli et al.

186 PLANETARY SCIENCE A rapid decrease in the rotation rate of comet 41P/Tuttle–Giacobini–Kresák

ON THE COVER

Twisted vista

The cover shows the William E. Gordon Telescope at the Arecibo Observatory in Puerto Rico. Jason Hessels and his colleagues used the telescope in their attempt to clarify the physical nature of the only known source of repeating fast radio bursts. Their results suggest that the radio bursts might come from a neutron star in an environment of extreme magnetized plasma. [PAGE 182](#)

D Bodewits, T L Farnham, M S P Kelley & M M Knight [SEE N&V P.158](#)

189 MATERIALS SCIENCE Bright triplet excitons in caesium lead halide perovskites

M A Becker et al. [SEE N&V P.163](#)

194 BIOGEOCHEMISTRY Fire frequency drives decadal changes in soil carbon and nitrogen and ecosystem productivity

A F A Pellegrini et al.

199 CONSERVATION BIOLOGY Successful conservation of global waterbird populations depends on effective governance

T Amano et al.

203 EVOLUTION Terminal Pleistocene Alaskan genome reveals first founding population of Native Americans

J V Moreno-Mayar et al.

208 MICROBIOLOGY Precision editing of the gut microbiota ameliorates colitis

W Zhu et al.

212 STEM CELLS Clonal analysis of lineage fate in native haematopoiesis

A E Rodriguez-Fraticelli et al.

217 BIOTECHNOLOGY Treatment of autosomal dominant hearing loss by *in vivo* delivery of genome editing agents

X Gao et al. [SEE N&V P.162](#)

222 CANCER A metabolic function of *FGFR3-TACC3* gene fusions in cancer

V Frattini et al.

228 MOLECULAR BIOLOGY Selective silencing of euchromatic L1s revealed by genome-wide screens for L1 regulators

N Liu et al.

233 STRUCTURAL BIOLOGY Opening of the human epithelial calcium channel TRPV6

L L McGoldrick et al.

238 ERRATUM Quark-level analogue of nuclear fusion with doubly heavy baryons

M Karliner & J L Rosner

238 ERRATUM PD-1 is a haploinsufficient suppressor of T cell lymphomagenesis

T Wartewig et al.

238 CORRIGENDUM A randomized synbiotic trial to prevent sepsis among infants in rural India

P Panigrahi et al.

CONSERVATION BIOLOGY

Saving birds

Waterbird conservation depends on good governance. [PAGE 199](#)
