

CONTENTS

ELECTRONICS TECHNOLOGY

- 223 **Algorithm for source recovery in underdetermined blind source separation based on plane pursuit**
FU Weihong, WEI Juan, LIU Naian, and CHEN Jiehu
- 229 **Improved pruning algorithm for Gaussian mixture probability hypothesis density filter**
NIE Yongfang and ZHANG Tao
- 236 **Weak GPS signal acquisition method based on DBZP**
WANG Jianing, LIAN Baowang, and XUE Zhe
- 244 **Self-adapting radiation control method for RFS in tracking**
LIU Hongqiang, YU Lei, YANG Haiyan, and ZHOU Zhongliang
- 256 **Constructions for almost perfect binary sequence pairs with even length**
PENG Xiuping, LIN Hongbin, REN Jiandong, and CHEN Xiaoyu
- 262 **Multi-sensor optimal weighted fusion incremental Kalman smoother**
SUN Xiaojun and YAN Guangming

DEFENCE ELECTRONICS TECHNOLOGY

- 269 **Deceptive jamming suppression in multistatic radar based on coherent clustering**
ABDALLA Ahmed, AHMED Mohaned Giess Shokrallah, ZHAO Yuan, XIONG Ying, and TANG Bin
- 278 **ISAR imaging based on improved phase retrieval algorithm**
SHI Hongyin, XIA Saixue, and TIAN Ye

SYSTEMS ENGINEERING

- 286 **Design method of organizational structure for MAVs and UAVs heterogeneous team with adjustable autonomy**
CHEN Jun, QIU Xunjie, RONG Jia, and GAO Xiaoguang
- 296 **Modeling and game strategy analysis of suppressing IADS for multiple fighters' cooperation**
LI Qiuni, YANG Rennong, LI Haoliang, ZHANG Huan, and FENG Chao

- 305 **Assessment and sequencing of air target threat based on intuitionistic fuzzy entropy and dynamic VIKOR**

ZHANG Kun, KONG Weiren, LIU Peipei, SHI Jiao, LEI Yu, and ZOU Jie

- 311 **Discrete decision model and multi-agent simulation of the Liang Zong two-chain hierarchical organization in a complex project**

MAI Qiang, ZHAO Yueqiang, and AN Shi

- 321 **Diffusion mechanism simulation of cloud manufacturing complex network based on cooperative game theory**

GENG Chao, QU Shiyu, XIAO Yingying, WANG Mei, SHI Guoqiang, LIN Tingyu, XUE Junjie, and JIA Zhengxuan

- 336 **Algorithm for complex network diameter based on distance matrix**

CHEN Bin, ZHU Weixing, and LIU Ying

CONTROL THEORY AND APPLICATION

- 343 **Adaptive sliding mode backstepping control for near space vehicles considering engine faults**

ZHAO Jing, JIANG Bin, XIE Fei, GAO Zhifeng, and XU Yufei

- 352 **Differential game strategy in three-player evasion and pursuit scenarios**

SUN Qilong, QI Naiming, XIAO Longxu, and LIN Haiqi

- 367 **Integrated modeling of spacecraft relative motion dynamics using dual quaternion**

PENG Xuan, SHI Xiaoping, and GONG Yupeng

- 378 **Direction navigability analysis of geomagnetic field based on Gabor filter**

XIAO Jing, DUAN Xiusheng, QI Xiaohui, and WANG Jianchen

SOFTWARE ALGORITHM AND SIMULATION

- 386 **An optimization method: hummingbirds optimization algorithm**

ZHANG Zhuoran, HUANG Changqiang, HUANG Hanqiao, TANG Shangqin, and DONG Kangsheng

- 405 **Hybrid artificial bee colony algorithm with variable neighborhood search and memory mechanism**

FAN Chengli, FU Qiang, LONG Guangzheng, and XING Qinghua

- 415 **Multi-focus image fusion based on block matching in 3D transform domain**

YANG Dongsheng, HU Shaohai, LIU Shuaiqi, MA Xiaole, and SUN Yuchao

RELIABILITY

- 429 **Remaining useful life prediction for a nonlinear multi-degradation system with public noise**

ZHANG Hanwen, CHEN Maoyin, and ZHOU Donghua

- 436 **Health evaluation method for degrading systems subject to dependent competing risks**

ZHAO Shuai, MAKIS Viliam, CHEN Shaowei, and LI Yong
