

Aircraft Engineering and Aerospace Technology

An International Journal

Number 2

- 86 Access this journal online
- 87 Aircraft flutter prediction using experimental modal parameters
Achuthan C. Pankaj, G. Shanthini, M.V. Shivaprasad and M. Manjuprasad
- 97 Aerodynamic performance of Parastoo UAV
Esmaeel Eslami, Mehran Tadjfar and Saman Najafi
- 104 Artificial bee colony optimized controller for unmanned rotorcraft pendulum
Sun Changhao and Haibin Duan
- 115 Health-state evaluation for aerospace systems
Xiaodong Tan, Jing Qiu, Guanjun Liu and Kehong Lv
- 126 Pinch-and-pull with spatial-temporal energy trajectory: new display concept for in-flight energy management
Fan Han, B.L. William Wong and Stephen Gaukrodger
- 136 A new standard instrument arrival: the point merge system
Özlem Sahin Meric and Oznur Usanmaz
- 144 Blending optimal algorithm for heliocentric solar sailing
Xiaoning Shi, Jifeng Guo, Naigang Cui and Rong Huang
- 150 Solution space research for interplanetary trajectory
Zunhui Zhao, Haibin Shang, Pingyuan Cui and Xiangyu Huang
- 161 Paper from the *AEAT* archives
