

# Optics & Laser Technology

Volume 42

Issue 4

June 2010

## Contents

- 535 Retrieve the aerosol size-distribution by using a "combined model"  
*H.-y. Zuo, Q.-j. Liu, S.-f. Zhu and S.-r. Luo*
- 540 The correlation between frequency difference and mode polarization in an intracavity birefringent dual-frequency laser  
*Z. Hu, S. Zhang, W. Liu and H. Jia*
- 546 Theory of 2x2 switch based on electro-optic and piezoelectric effects in photorefractive  $\text{LiNbO}_3$  crystal  
*X. Yan, H. Zou, X. Yang, H. Zhang and Y. Wang*
- 552 124W diode-side-pumped Nd:YAG laser in dynamic fundamental mode  
*J.-l. Ma, G. Zhong, J.-h. Wu, Z.-l. Qiao, G.-z. Wang and Q.-d. Duanmu*
- 556 Structure and optical properties of nanostructured zinc oxide films with different growth temperatures  
*D. Zhang, Y. He and C.Z. Wang*
- 561 Cubic sinusoidal phase mask: Another choice to extend the depth of field of incoherent imaging system  
*H. Zhao, Y. Li, H. Feng, Z. Xu and Q. Li*
- 570 A novel 1D target-based calibration method with unknown orientation for structured light vision sensor  
*Z. Wei, L. Cao and G. Zhang*
- 575 Dual-wavelength high-power Yb-doped double-clad fiber laser based on a few-mode fiber Bragg grating  
*D. Yang, P. Jiang, Y. Wang, B. Wu and Y. Shen*
- 580 High throughput jet singlet oxygen generator for multi kilowatt SCOIL  
*R. Rajesh, G. Singhal, Mainuddin, R.K. Tyagi and A.L. Dawar*
- 586 Measurement performance of an optical CCD-based pyrometer system  
*T. Fu, Z. Yang, L. Wang, X. Cheng, M. Zhong and C. Shi*
- 594 Light intensity modulation fiber-optic sensor for curvature measurement  
*Y. Fu, H. Di and R. Liu*
- 600 Optical limiting behavior of  $\text{C}_{60}$  doped ethylenepropylenediene polymethylene polymer  
*M.D. Zidan, Z. Aji, A.W. Allaf and A. Allahham*
- 604 Beam quality of radial Gaussian Schell-model array beams  
*X. Li, X. Ji and F. Yang*
- 610 Optical characteristics of  $\text{Cr}^{3+}$  and  $\text{Nd}^{3+}$  codoped  $\text{Y}_3\text{Al}_5\text{O}_{12}$  ceramics  
*M. Endo*
- 617 An improved watermarking method based on double random phase encoding technique  
*C. Yao-yao, Z. Xin, X. Yong-liang, Y. Sheng and W. Xiu-ling*
- 624 Electroluminescence characteristics of organic thin film pumped by pulsed excitation  
*W. Zhu, Z. Gan, B. Wei, X. Zhang, Z. Zhang and X. Jiang*
- 628 Correcting non-linear lens distortion in cameras without using a model  
*C. Ricolfè-Viala and A.-J. Sánchez-Salmerón*
- 640 Analytical vectorial structure of the anomalous hollow beam in the far field  
*D. Liu and Z. Zhou*
- 647 Accumulation morphology on the surface of stainless steel irradiated by a nanosecond Nd:YAG pulsed laser  
*Y.H. Liu, J.D. Hu, L. Zhao, Z.X. Guo, A.N. Chumakov and N.A. Bosak*
- 653 High resolution temperature insensitive interrogation technique for FBG sensors  
*Q. Wu, Y. Semenova, A. Sun, P. Wang and G. Farrell*

# Optics & Laser Technology

Volume 42

Issue 4

June 2010

*Contents continued from outside back cover)*

- 657 Parameters optimization and phase analysis of decentered grating stretchers  
*C. Wang, Y. Leng, C. Li, B. Zhao and Z. Xu*
- 662 Propagation properties of the beam generated by Gaussian mirror resonator passing through a paraxial *ABCD* optical system  
*Y. Feng, R. Zhang and B. Zhang*
- 669 Holographic solitons in centrosymmetric photorefractive crystals  
*K. Zhan, C. Hou, H. Tian and Y. Pei*
- 674 Using polarization properties to enhance performance of chaos synchronization communication between vertical-cavity surface-emitting lasers  
*S. Xiang, W. Pan, L. Yan, B. Luo, N. Jiang and K. Wen*
- 682 Scintillation effect on intensity modulated laser communication systems—a laboratory demonstration  
*W.O. Popoola, Z. Ghassemlooy, C.G. Lee and A.C. Boucouvalas*
- 693 Finite element modeling of the interaction of laser-generated ultrasound with a surface-breaking notch in an elastic plate  
*Y. Dai, B.Q. Xu, Y. Luo, H. Li and G.D. Xu*
